## INTRODUCTION AND OVERVIEW

### LETTER FROM THE CEO

To those Caribou Medical Center is here to serve:

On behalf of all involved in creating this 2023 Community Health Needs Assessment (CHNA), I invite you to review this document as we collaboratively strive to meet the health and medical needs in our those in our area.

While Caribou Medical Center (CMC) has always attempted to identify and serve the health needs of the community, this document reflects the efforts and results of our first official CHNA process, as identified by the federal government. Caribou Medical Center's 2023 CHNA process identifies local health and medical needs, and the subsequent implementation plan will communicate how CMC plans to respond to the prioritized needs in conjunction with other local organizations and agencies.

Over the next several months we will be developing a plan, in collaboration with community partners, to address the prioritized needs. Some issues are beyond the mission of CMC, and action is best suited for a response by others. Some improvements will require personal actions by individuals rather than the response of an organization. We view this as a process for how we, along with other organizations and agencies, can collaborate to bring the best each has to offer to address the more pressing, identified needs.

We invite you to review this 2023 CHNA document, provide feedback, and join us in creating a healthier community. We all live and work in this community together, and our collective efforts can make living here a more enjoyable and healthier experience.

Thank you,

Kent Loosle, CEO

Caribou Medical Center

## ABOUT CARIBOU MEDICAL CENTER

Caribou Medical Center is the result of over 100 years of development of hospital services in Soda Springs. Formerly known as Caribou County Hospital, located adjacent to the courthouse. It was replaced later with Caribou Memorial Hospital, built along Alexander Reservoir. In August 2021, county-owned Caribou Memorial Hospital transitioned to a non-profit 501(c)(3) entity called Caribou Medical Center (CMC).

Today, the community-owned critical access hospital is located at 300 South 3rd West in Soda Springs, Idaho. CMC is governed by a board of volunteers located within Caribou County. Services include an Emergency Department with 24/7 physician coverage, full radiology and clinical laboratory services, outpatient services, including wound care, ICU/CCU and inpatient beds, including “swing beds”, obstetrical care, and surgical services. CMC also operates medical, OB/GYN, and specialty clinics.

## MISSION OF CARIBOU MEDICAL CENTER

Be the Trusted Healthcare of Choice

## VISION OF CARIBOU MEDICAL CENTER

We will transform the health care experience for our community through a culture of caring, quality, safety, and excellence, and be recognized by employees, physicians, patients and families, volunteers and the community as: 1) The best place to work; 2) The best place to practice medicine; and 3) The best place to receive care.

## VALUES OF CARIBOU MEDICAL CENTER

Integrity \* Caring \* Safety \* Excellence \* Respect \* Trust

## APPROVAL OF CHNA

CMC Board of Directors approved and adopted the 2023 CHNA in December 2023.

## AVAILABILITY OF CHNA TO THE PUBLIC

This report will be made available to the public on the CMC website, [www.cariboumc.org](http://www.cariboumc.org). Paper copies may be obtained at no charge from administration by calling 208.547.3341 or contacting the hospital at the following address.

300 3rd W, Soda Springs, ID 83276

## ACKNOWLEDGEMENTS AND STEERING COMMITTEE

### ***STEERING COMMITTEE***

The CHNA steering committee established the methodology for conducting the CHNA and provided guidance and direction throughout the process.

The steering committee members included:

- Becky Bybee, Executive Compliance/Risk Mgmt Officer, CMC
- Dillon Liechty, COO, CMC

### ***CONSULTANTS***

CMC contracted with HealthTech to assist in conducting the 2023 Community Health Needs Assessment. HealthTech is a healthcare consulting and hospital management company based in Brentwood, Tennessee. HealthTech principal consultant was Julie Haynes.

## GAP ANALYSIS

Qualitative and quantitative data were used to complete the 2023 CHNA and identify community health priorities. The assessment was designed to provide a comprehensive and broad picture of the health in the overall community served. However, there may be several medical conditions that are not specifically addressed in this report due to various factors, including but not limited to, publicly available information or limited community input. In addition, certain population groups might not be identifiable or might not be represented in numbers sufficient for independent analysis. Examples include homeless, institutionalized persons, undocumented residents and members of certain ethnic groups who do not speak English. Efforts were made to obtain input regarding these specific populations through the community survey.

## OVERVIEW OF PROCESS

The Affordable Care Act requires nonprofit hospitals to complete a community health needs assessment (CHNA) process every three years. While CHNAs are a recent requirement, community health assessments (CHAs) have long been used as a tool by hospitals, public health departments, and other social service agencies to identify key community health concerns. A CHNA is a systematic process involving the community to identify and analyze community health needs and assets, prioritize those needs, and then implement a plan to address significant unmet needs.<sup>1</sup> Upon completing the assessment, CMC will develop implementation strategies to address the significant community health needs identified in the CHNA. Community Health Needs Assessment Process Graph:

SOURCE: <http://www.healthycommunities.org/Resources/toolkit.shtml>

<sup>1</sup> Catholic Health Association of the United States. (2015). Assessing and addressing community health needs. Retrieved from <https://www.chausa.org/communitybenefit/assessing-and-addressing-community-health-needs>

## DATA COLLECTION METHODOLOGY

A multi-faceted approach was used to gather information about the health needs of the community and to develop priorities for health improvement. The process focused on gathering and analyzing secondary data as well as obtaining input from community members to identify and define significant health needs, issues, and concerns.

Both quantitative and qualitative methods were utilized to gather data.

### **SECONDARY DATA**

A variety of secondary data sources were used to obtain data about both health trends and health disparities including but not limited to the following.

- The Idaho Statewide Healthcare Innovation Plan (SHIP)
- 2019 Community Health Needs Assessment for Southeast Idaho Public Health District
- County Health Rankings & Roadmaps
- CHNA Report, Worse Than State Average
- Dartmouth College Institute for Health Policy & Clinical Practice, Dartmouth Atlas of Health Care
- Centers for Medicare and Medicaid Services, Mapping Medicare Disparities Tool
- Centers for Medicare and Medicaid Services, CMS - Geographic Variation Public Use File
- Centers for Medicare & Medicaid Services, CMS - Part D Opioid Drug Mapping Tool
- Centers for Disease Control and Prevention, Behavioral Risk Factor Surveillance System
- University of Wisconsin Population Health Institute, County Health Rankings
- State Cancer Profiles
- Centers for Disease Control and Prevention, CDC - National Vital Statistics System.
- US Department of Transportation, National Highway Traffic Safety Administration, Fatality Analysis Reporting System
- Centers for Disease Control and Prevention, National Center for Chronic Disease Prevention and Health Promotion
- Social Vulnerability Index (<https://www.atsdr.cdc.gov/placeandhealth/svi/index.html>)
- Causes of Death (<https://www.worldlifeexpectancy.com/usa/idaho-heart-disease>)

Every effort was made to obtain the most current data. Data was analyzed for comparison purposes with the United States, the state of Idaho, and counties within the State when comparative data was available.

Pertinent secondary data captured is found in the appendices.

## **PRIMARY DATA**

A survey was conducted to acquire input from community members who represent the broad interest of the community. The results of the survey are included in the appendices.

Also, input was acquired from the Public Health Department by asking the director two (2) very open-ended questions. The questions and her responses can be found under the “Public Health Department Input” section of this report.

## **EVALUATION OF PRIOR CHNA IMPLEMENTATION PLAN**

An important piece of the three-year CHNA cycle is revisiting the progress made on priority needs set forth in the preceding CHNA. By reviewing the actions taken to address the significant needs and evaluating the impact those actions have made in the community, it is possible to better target resources and efforts during the next CHNA cycle.

Until recently, Caribou Medical Center did not meet the requirements imposed to complete and document CHNA efforts. Hence, an evaluation of the impact of actions taken since Caribou Medical Center finished conducting its immediately preceding CHNA is not included in this report.

Caribou Medical Center looks forward to contributing to the health needs in the community via the CHNA cycle.

## **DEMOGRAPHIC AND HEALTH PROFILE OF COMMUNITY SERVED**

### **GEOGRAPHIC ASSESSMENT AREA DEFINED**

The majority of CMC’s patients are from ZIP Codes in Caribou County. It is therefore reasonable to utilize Caribou County as the CHNA geographic area. Caribou County includes medically underserved, low-income and minority populations. All patients were used to determine CMC’s CHNA geographic area.

CMC’s CHNA SERVICE AREA
Caribou County

## DEMOGRAPHIC SNAPSHOT

The following tables provide a summary regarding the demographics of Caribou County. Data tables show total population of the community, as well as the breakout of the population between male and female and age distribution. Additional details about the demographics for the county are in Appendix 5 and 6.

POPULATION 2023	Caribou County		IDAHO
Male Population	3,593	50.6%	50.2%
Female Population	3,511	49.4%	49.8%
Total	7,104	100.0%	100.0%

SOURCE: HealthTech, September 2023; ERSI

POPULATION 2023 DISTRIBUTION BY AGE	Caribou County		IDAHO
0 - 24 years	2,238	31.5%	34.4%
24 - 44 years	1,669	23.5%	25.9%
45 - 64 years	1,683	23.7%	21.6%
65+ years	1,514	21.3%	18.1%
Total	7,104	100.0%	100.0%

## SOCIAL DETERMINANTS OF HEALTH AND HEALTH DATA

Information from a variety of secondary sources was reviewed and analyzed to develop a comprehensive picture of the health status and social determinants of health (SDOH) of the residents of Caribou County.

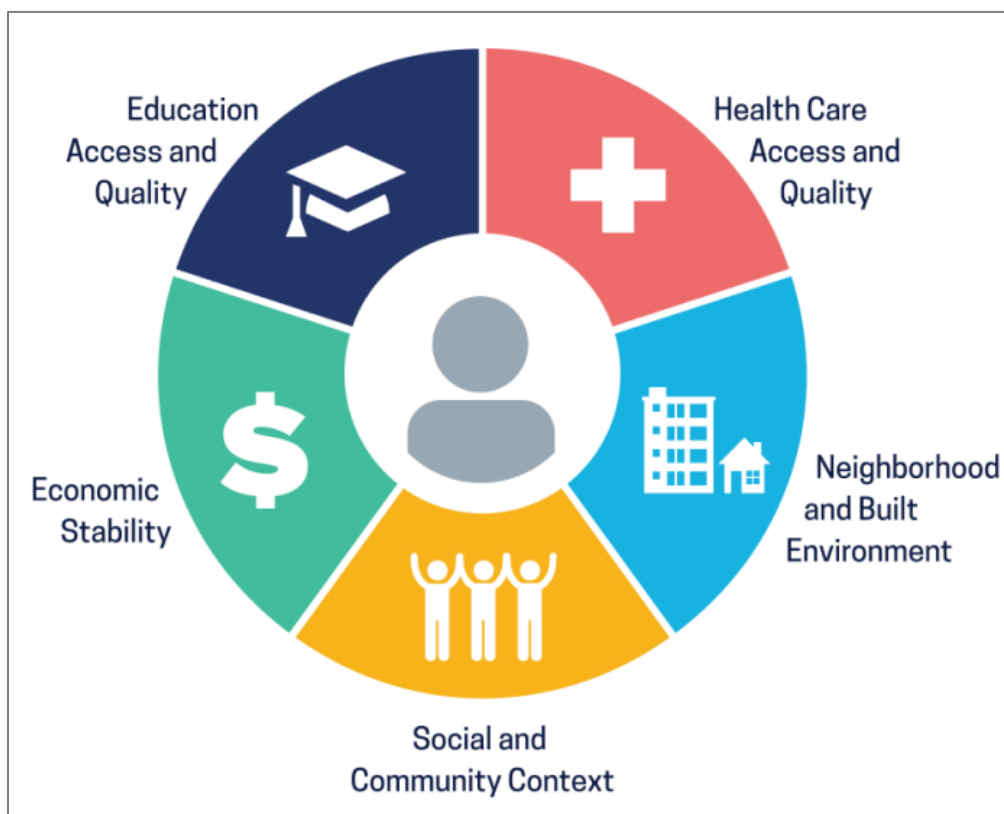

SDOH are conditions in the places where people live, learn, work, and play that affect a wide range of health risks and outcomes. SDOH include the social environment, physical environment, health services, and structural and societal factors. By applying what we know about SDOH, we can improve individual and population health.

Healthy People 2030 uses a place-based framework that outlines five key areas of SDOH<sup>2</sup>:

- Healthcare access and quality
- Education access and quality
- Social and community context
- Economic stability
- Neighborhood and built environment

<sup>2</sup> Healthy People 2030; <https://health.gov/healthypeople/priority-areas/social-determinants-health>

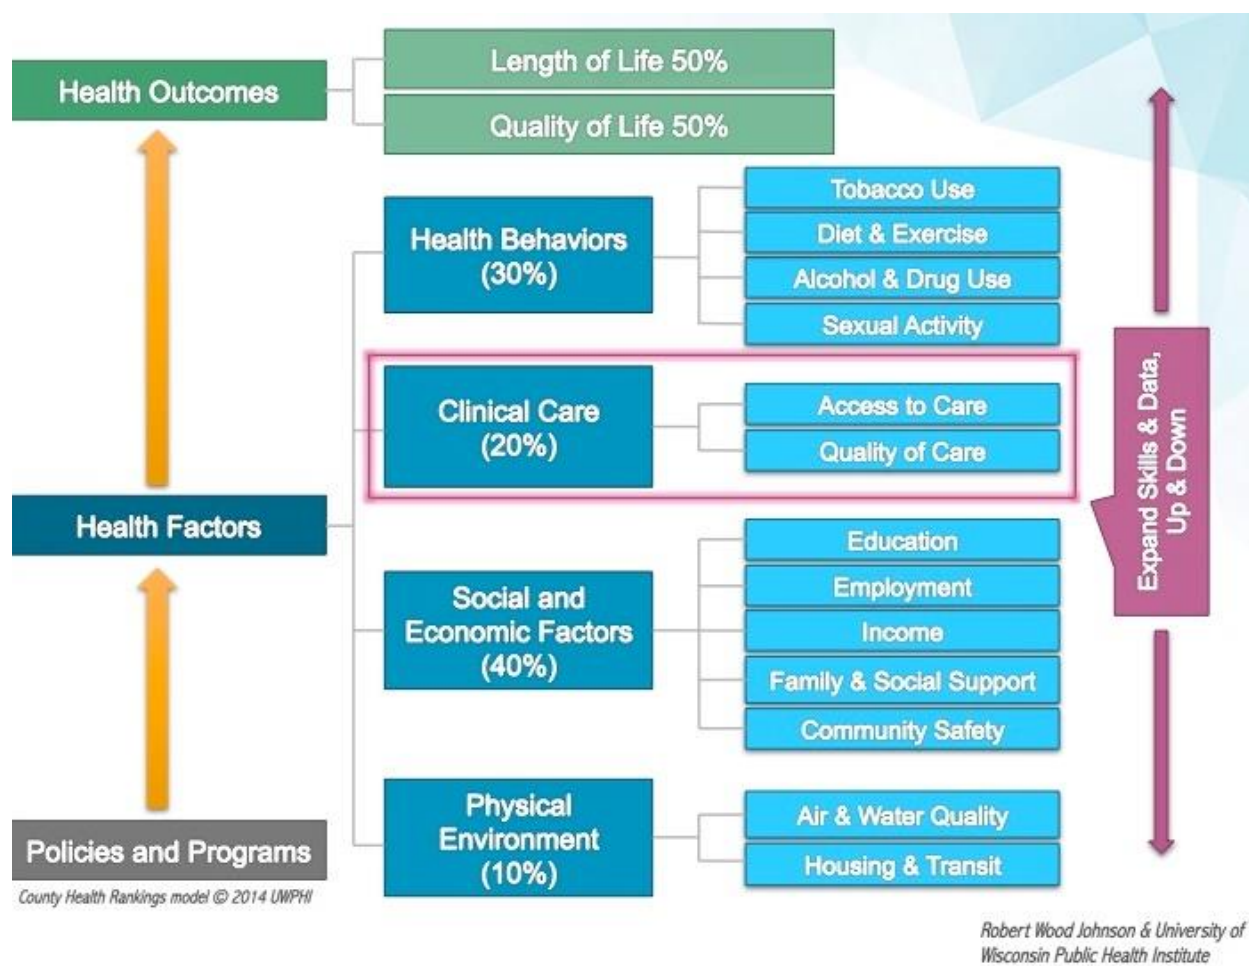

In addition to various data sources used to learn about the SDOH of the residents of Caribou County, the implications of the SDOH found in the 2020-2024 Idaho Statewide Healthcare Innovation Plan (SHIP) (Appendix 2) and the 2019 Community Health Needs Assessment for Southeast Idaho Public Health District (Appendix 3) were also considered when identifying the priorities for CMC's CHNA.

Also, attendees of CMC's Community Partners meeting reviewed and considered data from the County Health Rankings & Roadmaps website that is found in Appendix 4. The County Health Rankings are based on a model of community health that emphasizes the many factors that influence how long and how well we live. The Rankings use more than 30 measures that help communities understand how healthy their residents are today (health outcomes) and what will impact their health in the future (health factors).

Below is an image of the County Health Rankings & Roadmaps model<sup>3</sup>. At CMC's Community Partners meeting the remark was made that eighty percent (80%) of what affects health outcomes is associated with factors outside the traditional boundaries of healthcare delivery - health behaviors (e.g. tobacco use and sexual activity), social and economic factors (e.g. employment, education, and income), and physical environment (e.g. air and water quality).

<sup>3</sup> County Health Rankings & Roadmaps. <https://www.countyhealthrankings.org/explore-health-rankings/county-health-rankings-model>

The County Health Rankings & Roadmaps model was used as the framework when presenting, reviewing and considering various health outcomes and health factors data from a multitude of sources that is found compared to the State of Idaho in both a better than report (Appendix 5) and a worse than report (Appendix 6). Data extracted and presented from the reports were reviewed and considered by CMC's Community Partners meeting attendees when establishing the priorities.

Health outcomes are measured in part by the length of life in the County Health Rankings & Roadmaps model so the primary causes of death in Caribou County were reviewed and compared to the rates of both the state of Idaho and United States. The causes of death figures are found in the table below.

Cause of Death			Rank of Caribou County among all counties in Idaho (#1 rank = worst)	Quartile of Caribou County among all counties in Idaho (1st = worst)	Rate of Death per 100,000 age adjusted			Observation (Caribou County Rate compared to both U.S. & state of Idaho)
ID Rank	Caribou Rank	Condition			U.S.	Idaho	Caribou County	
1	1	Heart Disease	20 of 43	2nd	173.78	166.36	179.83	<b>Higher</b>
2	2	Cancer	28 of 43	3rd	146.55	140.44	147.66	<b>Higher</b>
3	3	COVID-19	7 of 43	1st (worse)	104.12	112.31	129.63	<b>Higher</b>
4	4	Accidents	26 of 43	3rd	64.71	59.84	57.06	<b>Lower</b>
7	5	Stroke	11 of 43	1st (worse)	41.14	36.82	51.11	<b>Higher</b>
5	6	Lung Disease	19 of 43	2nd	34.17	42.48	50.1	<b>Higher</b>
8	7	Diabetes	13 of 43	2nd	25.41	24.43	30.2	<b>Higher</b>
9	8	Suicide	7 of 43	1st (worse)	14.09	20.05	26.87	<b>Higher</b>
14	9	Influenza/Pneumonia	3 of 43	1st (worse)	10.53	7.82	25.29	<b>Higher</b>
6	10	Alzheimer's	25 of 43	3rd	30.96	40.48	23.25	<b>Lower</b>
13	11	Nephritis/Kidney	3 of 43	1st (worse)	13.55	8.11	14.05	<b>Higher</b>
10	12	Liver Disease	25 of 43	3rd	14.47	16.63	9.9	<b>Lower</b>
12	13	Hypertension/Renal	9 of 43	1st (worse)	10.69	8.37	8.11	<b>Lower</b>
11	14	Parkinson's	34 of 43	4th (best)	9.84	10.51	5.17	<b>Lower</b>
15	15	Blood Poisoning	31 of 43	3rd	10.22	5.74	4.08	<b>Lower</b>

4

## PUBLIC HEALTH DEPARTMENT INPUT

The following reflects the responses to two (2) very open-ended questions posed to Maggie Mann, Director of Southeastern Idaho Public Health.

What are the issues in Caribou County?

- Significant issues:
  - Opioid misuse
  - Behavioral health
  - Suicide

<sup>4</sup> World Life Expectancy. <https://www.worldlifeexpectancy.com/usa/idaho-heart-disease>

- Other issues of concern include:
  - Maternal/child health
  - Diabetes
  - Heart disease
  - Motor vehicle crash fatalities
  - Oral health

What should be done to address the issues?

- Leading systems-level, environmental changes through policy will likely have the most significant impact (rather than individual one on one education).
- Things like working to ensure all first responders are educated on Narcan use and have it readily available (this is likely already happening), as well as other community gathering places, to prevent opioid overdose fatalities is key.
- Making counseling available either on site or via telehealth is also critically important.
- Supporting walking and cycling through safe roadways, sidewalks, etc. can help (long term) with diabetes and heart disease.
- Road surfaces, road signage, etc. can help reduce motor vehicle crash fatalities.

## COMMUNITY SURVEY

CMC requested input from community members regarding the health needs of Caribou County. All the questions asked, and the responses provided are in Appendix 1. The data was shared at the Community Partners meeting to be considered when determining the priorities.

## PRIORITIZATION OF HEALTH NEEDS

### COMMUNITY PARTNERS MEETING

A group of individuals that represented the interests of the county and/or had specific expertise regarding the health needs of vulnerable and underserved populations were asked to participate in identifying priority health needs and services. The 15 people who attended and participated included representatives from the local government, the church, medical providers, CMC board of directors, CMC foundation board of directors, and CMC.

The Community Partners meeting was held at the Enders Hotel in Soda Springs, Idaho on Thursday, November 9<sup>th</sup> from 10:00 a.m. to 2:00 p.m. to review the data collected and prioritize the health needs. Julie Haynes, a consultant with HealthTech, facilitated the meeting.

## PRIORITIZATION CRITERIA

To identify the significant health needs and services of Caribou County, Community Partners meeting participants were asked to consider the following criteria when identifying their top three selections after reviewing the status of the prior CHNA efforts, as well as the primary and secondary data collected for the 2023 CHNA.

- **Magnitude/scale of the problem**  
The health need affects a large number of people within the community
- **Severity of the problem**  
The health need has serious consequences (morbidity, mortality, and/or economic burden) for those affected
- **Health disparities**  
The health need disproportionately impacts the health status of one or more vulnerable population groups
- **Community assets**  
The community can make a meaningful contribution to addressing the health need because of its relevant expertise and/or assets as a community and because of an organizational commitment to addressing the need
- **Ability to leverage**  
Opportunity to collaborate with existing community partnerships working to address the health need, or to build on current programs, emerging opportunities, etc.

## PRIORITIZATION INPUT

After small and large group discussion about priorities selected, each participant submitted their final votes. The following category headings were created and the number of votes in the form of a post-it note for each are indicated below.

- Chronic Disease (13.5 post-it notes/votes)
- Behavioral/Mental Health (12 post-it notes/votes)
- Preventive Care/Health Education (8.5 post-it notes/votes)
- Pain (4 post-it notes/votes)
- Drugs (3 post-it notes/votes)
- Access to Resources (1 post-it notes/votes)

## **PRIORITIZED HEALTH NEEDS**

To prioritize the significant health needs and services of Caribou County, the top three selections made by each meeting participant were submitted and then grouped together by like topic. The group discussed the outcome and determined that the topics with the highest number of selections were the top priorities. Below is the list of prioritized health needs and services for Caribou County that were generated by the Community Partners meeting participants.

- Chronic Disease
- Behavioral/Mental Health
- Preventive Care/Health Education

## **NEXT STEPS**

Over the next several months, CMC, in collaboration with community partners, will develop an implementation plan for each of the priority health needs. The implementation plan will be published in a separate report.

## **APPENDIX 1: COMMUNITY SURVEY**

A community survey link opened mid-August 2023, and closed the beginning of October, 2023. A link to the community survey was distributed and promoted via both Facebook and email distribution lists (i.e., CMC staff and board members members). Also, paper copies of the community survey were distributed at all admissions desks in the hospital and clinics during this same time frame. There was a total of 81 survey respondents (15 paper surveys were returned and 66 utilized the survey link).

All the questions asked, and the responses provided are in this appendix.

Community Health Needs Assessment Survey  
Caribou Medical Center  
Fall 2023

Q1. What is your age range?		
18-24	2.47%	2
25-44	56.79%	46
45-64	28.4%	23
65+	12.35%	10
	Answered	81
	Skipped	0

Q2. What is your gender?		
Female	76.54%	62
Male	19.75%	16
Prefer not to answer	3.7%	3
Other	0.0%	0
	Answered	81
	Skipped	0

Q3. This survey is intended to support the assessment of health needs of individuals in Caribou County. Please indicate which ZIP Code you live (or plan to live) in at least six (6) months out of the year.		
83276 Soda Springs	62.96%	51
83241 Grace, Niter, and Lago	18.52%	15
83230 Soda Springs	9.88%	8
83217 Bancroft and Chesterfield	3.7%	3
83285 Soda Springs	2.47%	2
83285 Waylan	1.23%	1
my ZIP Code is not listed. (Thank you, you are finished with this survey.)	1.23%	1
83283 Thatcher	0.0%	0
	Answered	81
	Skipped	0

Q4. How would you rate the general health of our community?		
Slightly healthy (unhealthy)	48.15%	39
Healthy	46.91%	38
Very healthy	4.94%	4
Not at all healthy (very unhealthy)	0.0%	0
Extremely healthy	0.0%	0
	Answered	81
	Skipped	0

Q5. What are the three (3) most important health problems that affect the health of our community?		
Chronic diseases (arthritis, heart disease, cancer, Alzheimer's, diabetes, etc.)	62.96%	51
Mental health (depression, anxiety)	61.73%	50
Prescription drug abuse	39.51%	32
Obesity (lack of nutrition/exercise)	35.8%	29
Drug abuse/overdose	29.63%	24
Alcohol abuse	25.93%	21
Tobacco/cigarette/vaping use	23.46%	19
Falls	11.11%	9
Infectious disease (flu, ticks, foodborne, measles)	3.7%	3
Other (please specify)	3.7%	3
Reproductive/sexual health (unintended pregnancy and/or sexually transmitted diseases)	2.47%	2
	Answered	81
	Skipped	0

Q6. Social determinants of health are conditions in the environment in which people are born, live, learn, work, play, worship, and age that affect a wide range of health, functioning, and quality-of-life outcomes. Please select the three (3) most important social determinants that most negatively impact the people in Caribou County.		
Lack of access to mental healthcare	35.8%	29
Lack of job opportunities	25.93%	21
Lack of knowledge/stigma of mental illness	24.69%	20
Lack of health education	23.46%	19
Lack of affordable safe housing	23.46%	19
Social isolation/loneliness	20.99%	17
Limited places to exercise	20.99%	17
Availability/access to insurance	18.52%	15
Limited access to healthy foods	16.05%	13
Lack of affordable childcare	14.81%	12
School dropout/poor schools	11.11%	9
Environmental health (water, air pollution)	11.11%	9
Cultural norms	11.11%	9
Transportation problems	7.41%	6
Motor vehicle safety (accidents, car seat/seat belt safety, cell phone use while driving)	7.41%	6
Lack of access to healthcare	7.41%	6
Domestic violence and/or sexual abuse	4.94%	4
Limited health literacy or limited English proficiency	3.7%	3
Racial/ethnicity discrimination	2.47%	2
Elder abuse	2.47%	2
Poverty	2.47%	2
Child abuse/neglect	1.23%	1
Lack of access to dental care	1.23%	1
Other (please specify)	1.23%	1
Gender discriminatin	0.0%	0
Neighborhood safety/violence	0.0%	0
Lack of access to media and emerging technologies (e.g., cell phones, internet, social media)	0.0%	0
	Answered	81
	Skipped	0

Q7. What would be the three (3) best ways to improve people's health in our community?		
Access to mental health providers	55.56%	45
Awareness of local services	48.15%	39
Affordable healthy food	40.74%	33
Community education	33.33%	27
Access to health insurance	32.1%	26
School health programs	23.46%	19
Access to healthcare	16.05%	13
Transportation services	12.35%	10
Other (please specify)	12.35%	10
Worksite health programs	9.88%	8
Changes to public policy/laws	8.64%	7
Access to dental care	7.41%	6
Remove language barrier	0.0%	0
	Answered	81
	Skipped	0

Q8. Please rate each of the following statements about healthcare access in the area with "strongly disagree," "slightly disagree," "slightly agree," or "strongly agree."						
	Strongly Disagree	Slightly Disagree	Slightly Agree	Strongly Agree	Do Not Know	Total
There is a sufficient number of mental/behavioral health providers in the area.	29	26	10	3	12	81
Transportation for medical appointments is available to area residents when needed.	25	21	14	5	16	81
Residents in the area are able to access a medical specialist when needed (cardiologist, dermatologist, neurologist, etc.)	10	35	27	8	1	81
There is a sufficient number of bilingual providers in the area.	7	21	28	8	17	81
There is a sufficient number of providers accepting Medicaid and medical assistance in the area.	6	9	22	25	19	81
Residents in the area are able to access a primary care provider when needed (family doctor, pediatrician, general practitioner.)	2	15	33	30	1	81
Residents in the area are able to access a dentist when needed.	2	5	17	54	2	81
					Answered	81
					Skipped	0

Q9. Using a scale of "major problem," "moderate problem," "minor problem," or "no problem at all," please rate each of the following topics.

	Major Problem	Moderate Problem	Minor Problem	No Problem At All	Total
Mental health	38	42	1	0	81
Drug/substance abuse	30	46	5	0	81
Affordable healthcare	28	41	12	0	81
Cancer	21	44	15	1	81
Tobacco use	19	43	19	0	81
Women's health	17	41	21	2	81
Heart disease & stroke	16	50	15	0	81
Diabetes	15	57	9	0	81
Disability & chronic pain	13	48	17	3	81
Nutrition, physical activity & weight	12	59	10	0	81
Access to healthcare services	9	40	31	1	81
Lung/respiratory disease	9	53	19	0	81
Infant health & family planning	7	28	37	9	81
Dementia/Alzheimer's disease	7	42	31	1	81
Sexual health	7	29	40	5	81
Kidney disease	6	33	38	4	81
Dental/oral health	3	25	44	9	81
Injury and violence	2	32	46	1	81

Q10. What are the most significant barriers that keep people in the community from accessing healthcare when they need it? (Select all that apply.)		
Lack of finances with insurance coverage (such as high deductibles, co-pays, out-of-pocket prescription expenses, etc.)	76.54%	62
Lack of health insurance coverage (lack of coverage, poor coverage, provider not covered)	60.49%	49
Availability of providers/appointments	59.26%	48
Only seeking medical care when in pain or very sick	56.79%	46
No insurance	49.38%	40
Fear or mistrust of medical providers	38.27%	31
Inability to navigate healthcare system (including unsure if services were available)	37.04%	30
Time limitations (long wait times, limited office hours, time off work)	34.57%	28
Not understanding the importance of regular checkups	34.57%	28
Lack of transportation	25.93%	21
Lack of childcare	22.22%	18
Language/cultural barrier	11.11%	9
Complicated enrollment process for health insurance	11.11%	9
Internet/technology access	9.88%	8
Basic needs not met (food/shelter)	8.64%	7
Internet/technology knowledge	8.64%	7
Other barrier not listed (please specify)	3.7%	3
Fear of deportation	2.47%	2
Discrimination	2.47%	2
None/no barriers	1.23%	1

## **APPENDIX 2: GOALS AND PRIORITIES IN IDAHO STATEWIDE HEALTHCARE INNOVATION PLAN 2020-2024**

Led by the Division of Public Health, Get Healthy Idaho is a five-year plan, consisting of two integral parts: a statewide, comprehensive population health assessment that provides the foundation for understanding the health of Idahoans and its communities; and a population health improvement plan focused on efforts to address specific priority areas identified through the assessment. The priorities of Get Healthy Idaho were considered for CMC's CHNA since it was developed collaboratively with data and input from partners and stakeholders across the state.

The identified four specific goals found in the 2020-2024 SHIP are:

- Advance Equity
- Enhance Partnerships
- Financial Longevity of Placed-Based Initiatives
- Create an Equity-Centered Data System

The four priorities identified were:

- Behavioral health
- Diabetes
- Overweight and Obesity
- Unintentional injury (specifically motor-vehicle accidents, falls and accidental poisoning/drug overdose)

## **APPENDIX 3: OVERVIEW OF 2019 COMMUNITY HEALTH NEEDS ASSESSMENT FOR SOUTHEAST IDAHO PUBLIC HEALTH DISTRICT**

The following summary of findings and next steps found in the 2019 Community Health Needs Assessment for Southeast Idaho Public Health District were considered when determining the priorities for CMC's CHNA.

### **Summary of Findings**

- Health outcomes related to lack of services
  - Suicide rates for all ages high across all counties
  - 5-12% of births have late or no prenatal care
- Health outcomes can be improved with screening services
  - Breast cancer
  - Prostate cancer
  - Colorectal cancer
- Health outcomes related to behavioral risk factors
  - CVD [Cardiovascular disease], Diabetes, Cancers
    - Physical inactivity common
    - Access to fruits and vegetables limited

### **Next Steps**

- Prioritization of Health Issues
- Collaboration among Different Organizations
- Identification of Existing Resources and Services
- Development and Implementation of New Resources and Services

## **APPENDIX 4: COUNTY HEALTH RANKINGS & ROADMAPS**

The County Health Rankings & Roadmaps Program is a collaborative between the Robert Wood Johnson Foundation and the University of Wisconsin Population Health Institute. The rankings are determined by the following factors:

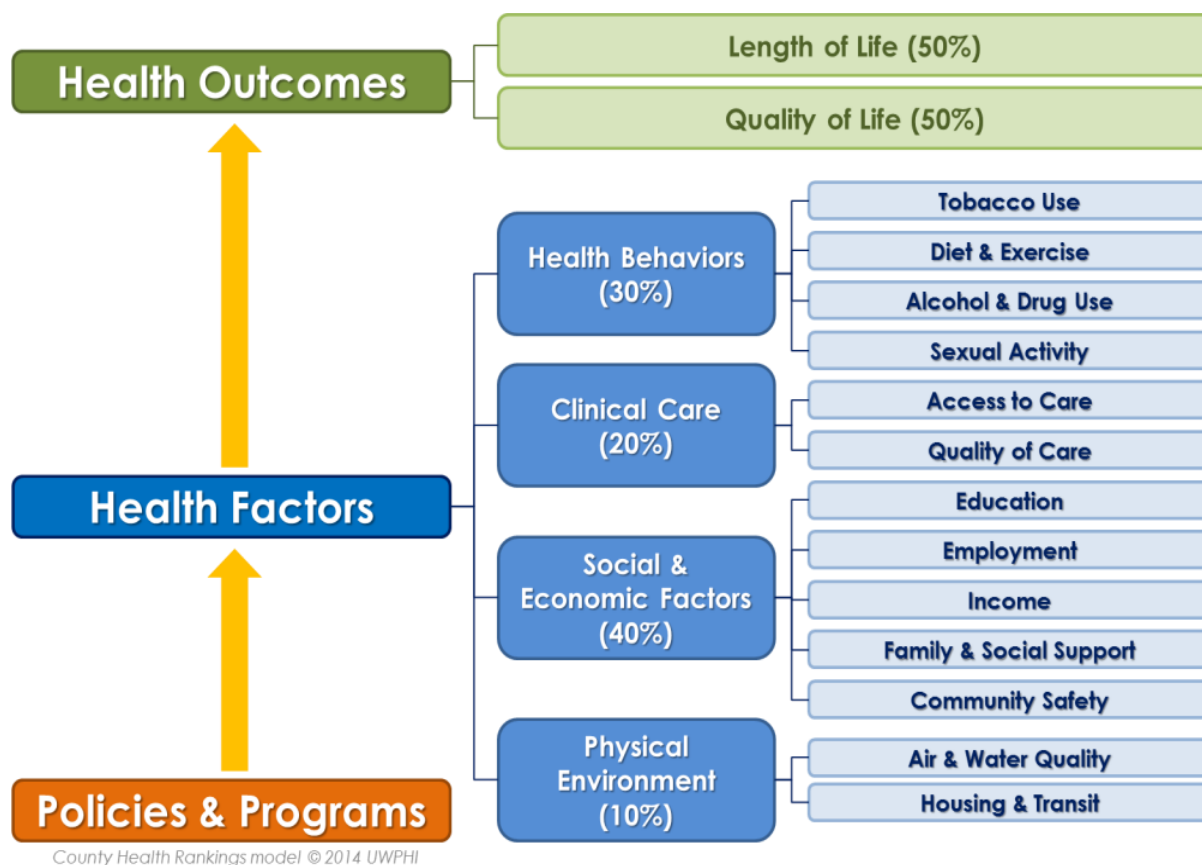

**HEALTH OUTCOMES:** “The overall rankings in health outcomes represent how healthy counties are within the state. The healthiest county in the state is ranked #1. The ranks are based on two types of measures: how long people live and how healthy people feel while alive.”

**HEALTH FACTORS:** “The overall rankings in health factors represent what influences the health of a county. They are an estimate of the future health of counties as compared to other counties within a state. The ranks are based on four types of measures: health behaviors, clinical care, social and economic, and physical environment factors.”<sup>5</sup>

The rankings are based on a model of population health that emphasizes the many factors that, if improved, can help make communities healthier places to live, learn, work, and play.

---

<sup>5</sup> [www.countyhealthrankings.org](http://www.countyhealthrankings.org)

The table below shows how Caribou County ranks out of the 43 counties in Idaho. A ranking of one (1) represents the healthiest county. Caribou County is ranked in the first quartile in the state as compared to the other 43 counties in Idaho for both health outcomes (11<sup>th</sup>) and factors (10<sup>th</sup>).

## **APPENDIX 5: DEMOGRAPHICS + HEALTH OUTCOMES AND HEALTH FACTORS DATA – BETTER THAN IDAHO STATE DATA**

Appendix 5 contains the “better than” Idaho state data while Appendix 6 reflects the “worse than” Idaho state data. The information presented in this Appendix reflects the framework used by the County Health Rankings & Roadmaps program, a collaborative between the Robert Wood Johnson Foundation and the University of Wisconsin Population Health Institute. The data presented in this Appendix uses the following outline for the report.

- Demographics
- Income and Economics
- Education
- Housing and Families
- Other Social and Economic Factors
- Physical Environment
- Clinical Care and Prevention
- Health Behaviors
- Health Outcomes
- Healthcare Workforce
- Special Topics – COVID-19

## Demographics

Current population demographics and changes in demographic composition over time play a determining role in the types of health and social services needed by communities.

### Population with Any Disability

This indicator reports the percentage of the total civilian non-institutionalized population with a disability. The report area has a total population of 6,932 for whom disability status has been determined, of which 819 or 11.81% have any disability. This indicator is relevant because disabled individuals comprise a vulnerable population that requires targeted services and outreach by providers.

Report Area	Total Population (For Whom Disability Status Is Determined)	Population with a Disability	Population with a Disability, Percent
Caribou County, ID	6,932	819	11.81%
Idaho	1,789,734	244,431	13.66%
United States	324,818,565	41,055,492	12.64%

Note: This indicator is compared to the state average.  
Data Source: US Census Bureau, [American Community Survey](#), 2017-21. Source geography: Tract

[View larger map](#)

**Disabled Population, Percent by Tract, ACS 2017-21**

- Over 18.0%
- 15.1 - 18.0%
- 12.1 - 15.0%
- Under 12.1%
- No Data or Data Suppressed
- Caribou County, ID

## Population with Limited English Proficiency

This indicator reports the percentage of the population aged 5 and older who speak a language other than English at home and speak English less than "very well". This indicator is relevant because an inability to speak English well creates barriers to healthcare access, provider communications, and health literacy/education. Of the 6,559 total population aged 5 and older in the report area, 122 or 2.00% have limited English proficiency.

Report Area	Population Age 5+	Population Age 5+ with Limited English Proficiency	Population Age 5+ with Limited English Proficiency, Percent
Caribou County, ID	6,559	122	2.00%
Idaho	1,696,648	62,846	4.00%
United States	310,302,360	25,535,259	8.00%

Note: This indicator is compared to the state average.

Data Source: US Census Bureau, *American Community Survey*. 2017-21. Source geography: Tract

[View larger map](#)

Population with Limited English Proficiency, Percent by Tract, ACS 2017-21

## Income and Economics

Economic and social insecurity often are associated with poor health. Poverty, unemployment, and lack of educational achievement affect access to care and a community's ability to engage in healthy behaviors. Without a network of support and a safe community, families cannot thrive. Ensuring access to social and economic resources provides a foundation for a healthy community.

### Employment - Labor Force Participation Rate

The table below displays the labor force participation rate for the report area. According to the 2016 – 2021 American Community Survey, of the 5,349 working age population, 3,371 are included in the labor force. The labor force participation rate is 63.02%.

Report Area	Total Population Age 16+	Labor Force	Labor Force Participation Rate
Caribou County, ID	5,349	3,371	63.02%
Idaho	1,405,245	883,059	62.84%
United States	264,087,642	166,672,597	63.11%

Note: This indicator is compared to the state average.

Data Source: US Census Bureau, *American Community Survey*. 2017-21. Source geography: County

Labor Force Participation Rate

[View larger map](#)

Labor Force, Participation Rate by Tract, ACS 2017-21

## Income - Inequality (GINI Index)

This indicator reports income inequality using the Gini coefficient. Gini index values range between zero and one. A value of one indicates perfect inequality where only one household has any income. A value of zero indicates perfect equality, where all households have equal income.

*Note: Index values are acquired from the 2017-21 American Community Survey and are not available for custom report areas or multi-county areas.*

Report Area	Total Households	Gini Index Value
Caribou County, ID	2,470	<b>0.37</b>
Idaho	657,101	0.44
United States	124,010,992	0.48

*Note: This indicator is compared to the state average.*

*Data Source: US Census Bureau, American Community Survey. 2017-21. Source geography: Tract*

[View larger map](#)

### Income Inequality (GINI), Index Value by Tract, ACS 2017-21

## Income - Median Household Income

This indicator reports median household income based on the latest 5-year American Community Survey estimates. This includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the householder or not. Because many households consist of only one person, average household income is usually less than average family income. There are 2,470 households in the report area, with an average income of \$76,059 and a median income of \$65,528.

Report Area	Total Households	Average Household Income	Median Household Income
Caribou County, ID	2,470	\$76,059	<b>\$65,528</b>
Idaho	657,101	\$83,777	\$63,377
United States	124,010,992	\$97,196	\$69,021

*Note: This indicator is compared to the state average.*

*Data Source: US Census Bureau, American Community Survey. 2017-21. Source geography: Tract*

[View larger map](#)

Median Household Income by Tract, ACS 2017-21

## Poverty - Children Below 100% FPL

In the report area 8.86% or 174 children aged 0-17 are living in households with income below the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

Report Area	Total Population	Population < Age 18	Population < Age 18 in Poverty	Population < Age 18 in Poverty, Percent
Caribou County, ID	6,915	1,964	174	8.86%
Idaho	1,780,875	452,483	61,481	13.59%
United States	321,897,703	72,996,065	12,443,424	17.05%

Note: This indicator is compared to the state average.

Population Below the Poverty Level, Children (Age 0-17), Percent by Tract, ACS 2017-21

## Poverty - Children Below 200% FPL

In the report area 30.24% or 594 children are living in households with income below 200% of the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

Note: The total population measurements for poverty reports are lower, as poverty data collection does not include people in group quarters. See Methodology for more details.

Report Area	Total Population Under Age 18	Population Under Age 18 Below 200% FPL	Population Under Age 18 Below 200% FPL, Percent
Caribou County, ID	1,964	594	30.24%

## Poverty - Population Below 100% FPL

Poverty is considered a *key driver* of health status.

Within the report area 6.67% or 461 individuals for whom poverty status is determined are living in households with income below the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

*Note: The total population measurements for poverty reports are lower, as poverty data collection does not include people in group quarters. See Methodology for more details.*

## Poverty - Population Below 100% FPL (Annual)

Poverty is considered a *key driver* of health status.

In the report area 7.9% or 556 individuals for whom poverty status is determined are living in households with income below 100% of the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

Report Area	Total Population	Population in Poverty	Percent Population in Poverty

## Debt - Any Debt in Collections

This indicator reports data from a 2 percent nationally representative panel of deidentified, consumer-level records from a major credit bureau at the national, state, and county levels for the 50 states and Washington, DC, as of February 2022, compiled by the Urban Institute. The share with any debt in collections and the median debt in collections within the report area are shown as below. The Share with Any Debt in Collections is defined as the share of people with a credit bureau record who have any debt in collections. This includes past-due credit lines that have been closed and charged-off on the creditor's books as well as unpaid bills reported to the credit bureaus that the creditor is attempting to collect. The Median Debt in Collections is the median amount of all debt in collections among those with any debt in collections.

As of February 2022, of all the people who have a credit bureau record in the report area, there were sum(0) that have any debt in collections at a median amount of sum(1).

Note: Credit bureau metrics are not reported when they are based on fewer than 50 people.

Report Area	Share with Any Debt in Collections	Median Debt in Collections
Caribou County, ID	1,652.54%	No data
Idaho	1,969.40%	\$1,965
United States	2,619.01%	\$1,739

## Education

This category contains indicators that describe the education system and the educational outcomes of report area populations. Education metrics can be used to describe variation in population access, proficiency, and attainment throughout the education system, from access to pre-kindergarten through advanced degree attainment. These indicators are important because education is closely tied to health outcomes and economic opportunity.

### Access - Childcare Centers

This indicator reports the number of childcare centers per 1,000 population under 5 years old. Data are acquired from the 2021 Homeland Infrastructure Foundation-Level Data (HIFLD) and are used in the 2022 County Health Rankings.

Within the report area there is a total of 2 childcare centers or a rate of 4.47 childcare centers per 1,000 population under 5 years old, which is greater than the state rate of 3.94.

Report Area	Population under 5	Total Childcare Centers	Rate of Childcare Centers per 1,000 Population Age < 5
Caribou County, ID	447	2	4.47
Idaho	117,909	465	3.94

### Access - Head Start

Head Start is a program designed to help children from birth to age five who come from families at or below poverty level. The program's goal is to help children become ready for kindergarten while also providing the needed requirements to thrive, including health care and food support.

This indicator reports the number and rate of Head Start program facilities per 10,000 children under age 5. Head Start facility data is acquired from the US Department of Health and Human Services (HHS) 2022 Head Start locator. Population data is from the 2010 US Decennial Census. The report area has a total of 1 Head Start program with a rate of 18.28 per 10,000 children under 5 years old.

Report Area	Children Under Age 5	Total Head Start Programs	Head Start Programs, Rate (Per 10,000 Children Under Age 5)
Caribou County, ID	547	1	18.28

## Access - Childcare Cost Burden

This indicator reports the childcare costs for a median-income household with two children as a percentage of household income. Data are acquired from the 2021&2020 Living Wage Calculator and Small Area Income and Poverty Estimates and are used in the 2022 County Health Rankings.

Within the report area, on average households with two children spend 16.13% of their household income on childcare, which is lower than the state average of 19.59%.

Report Area	Childcare Costs, Percentage of Household Income (Median-Income Family)
Caribou County, ID	16.13%
Idaho	19.59%
United States	26.02%

## Attainment - High School Graduation Rate

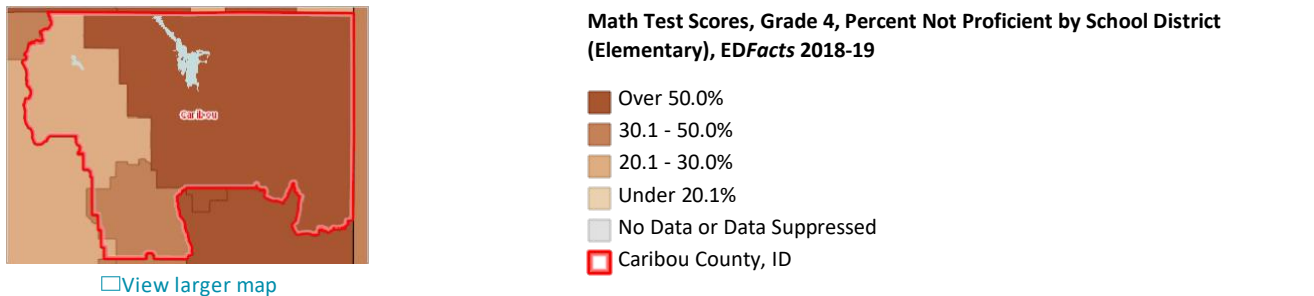

The adjusted cohort graduation rate (ACGR) is a graduation metric that follows a “cohort” of first-time 9th graders in a particular school year, and adjust this number by adding any students who transfer into the cohort after 9th grade and subtracting any students who transfer out, emigrate to another country, or pass away. The ACGR is the percentage of the

students in this cohort who graduate within four years. In the report area, the adjusted cohort graduation rate was 91.3% during the most recently reported school year. Students in the report area performed better than the state, which had an ACGR of 84.0%.

## Proficiency - Student Math Proficiency (4th Grade)

Information about student performance in the 4th grade Math portion of the state-specific standardized tests are displayed in the table below. Of 319 students tested, 54.2% of 4th graders performed at or above the "proficient" level, and 45.8% tested below the "proficient" level, according to the latest data. Students in the report area tested better than the statewide rate of 46.3%.

## Proficiency - Student Reading Proficiency (4th Grade)

Information about student performance in the 4th grade English Language Arts portion of the state-specific standardized tests are displayed in the table below. Of 319 students tested, 55.2% of 4th graders performed at or above the "proficient" level, and 44.8% tested below the "proficient" level, according to the latest data. Students in the report area tested better than the statewide rate of 48.1%.

Report Area	Students with Valid Test Scores	Students Scoring 'Proficient' or Better, Percent	Students Scoring 'Not Proficient' or Worse, Percent
Caribou County, ID	319	55.2%	44.8%
Idaho	81,960	48.1%	51.9%

## Housing and Families

This category contains indicators that describe the structure of housing and families, and the condition and quality of housing units and residential neighborhoods. These indicators are important because housing issues like overcrowding and affordability have been linked to multiple health outcomes, including infectious disease, injuries, and mental disorders. Furthermore, housing metrics like home-ownership rates and housing prices are key for economic analysis.

### Household Structure - Single-Parent Households

This indicator reports the percentage of children who live in households where only one parent is present.

Report Area	Population Age 0-17	Children in Single-Parent Households	Percentage of Children in Single-Parent Households
Caribou County, ID	1,994	270	13.54%

## Housing Costs - Cost Burden (30%)

This indicator reports the percentage of the households where housing costs are 30% or more of total household income. This indicator provides information on the cost of monthly housing expenses for owners and renters. The information offers a measure of housing affordability and excessive shelter costs. The data also serve to aid in the development of housing programs to meet the needs of people at different economic levels. Of the 2,470 total households in the report area, 388 or 15.71% of the population live in cost burdened households.

Report Area	Total Households	Cost-Burdened Households	Cost-Burdened Households, Percent
Caribou County, ID	2,470	388	15.71%

[View larger map](#)

**Overcrowded Housing (Over 1 Person/Room), Percent by Tract, ACS 2017-21**

## Housing Quality - Substandard Housing

This indicator reports the number and percentage of owner- and renter-occupied housing units having at least one of the following conditions: 1) lacking complete plumbing facilities, 2) lacking complete kitchen facilities, 3) with 1 or more occupants per room, 4) selected monthly owner costs as a percentage of household income greater than 30%, and 5) gross rent as a percentage of household income greater than 30%. Selected conditions provide information in assessing the quality of the housing inventory and its occupants. This data is used to easily identify homes where the quality of living and housing can be considered substandard. Of the 2,470 total occupied housing units in the report area, 454 or 18.38% have one or more substandard conditions.

Report Area	Total Occupied Housing Units	Occupied Housing Units with One or More Substandard Conditions	Occupied Housing Units with One or More Substandard Conditions, Percent
Caribou County, ID	2,470	454	18.38%

## Homeless Children & Youth

This indicator reports the number of homeless children and youth enrolled in the public school system during the school year 2019-2020. According to the data source definitions, homelessness is defined as lacking a fixed, regular, and adequate nighttime residence. Those who are homeless may be sharing the housing of other persons, living in motels, hotels, or camping grounds, in emergency transitional shelters, or may be unsheltered. Data are aggregated to the report-area level based on school-district summaries where three or more homeless children are counted.

In the report area, of all the 1,376 students enrolled in reported districts during the school year 2019-2020, there were 34 or 2.50% homeless students, which is lower than the statewide rate of 2.78%.

Note: Data are available for 100.00% school districts in the report area, representing 100.00% of the public school student population.

Report Area	Students in Reported Districts	Homeless Students	Homeless Students, Percent	Districts Reporting	Students in Reported Districts
Caribou County, ID	1,376	34	2.50%	100.00%	100.00%

## Evictions

This indicator reports information about formal evictions based on court records from 48 states and the District of Columbia, compiled by the Eviction Lab. The number evictions and eviction filings within the report area is shown in below. The “filing rate” is the ratio of the number of evictions filed in an area over the number of renter-occupied homes in that area. An “eviction rate” is the subset of those homes that received an eviction judgment in which renters were ordered to leave. For the year 2016, the Eviction Lab reports that, of 591 rental homes in the report area, there were 0 eviction filings, for an eviction filing rate of 0%. 0 of the eviction filings ended in an eviction, for an eviction rate of 0%.

Note: Not all counties have data that has been provided. Indicator data do not include information about "informal evictions", or those that happen outside of the courtroom.

Report Area	Renter Occupied Households	Eviction Filings	Evictions	Eviction Filing Rate	Eviction Rate
Caribou County, ID	591	0	0	0%	0%
Idaho	182,896	2,037	1,107	1.11%	0.61%

#### Evictions, Rate per 100 Rental Homes by County, Eviction Lab 2016

## Other Social & Economic Factors

Economic and social insecurity often are associated with poor health. Poverty, unemployment, and lack of educational achievement affect access to care and a community's ability to engage in healthy behaviors. Without a network of support and a safe community, families cannot thrive. Ensuring access to social and economic resources provides a foundation for a healthy community.

## Food Insecurity Rate

This indicator reports the estimated percentage of the population that experienced food insecurity at some point during the report year. Food insecurity is the household-level economic and social condition of limited or uncertain access to adequate food.

Report Area	Total Population	Food Insecure Population, Total	Food Insecurity Rate
Caribou County, ID	7,000	490	7.00%
Idaho	1,757,356	152,890	8.70%
United States	326,616,501	33,365,240	10.22%

## Insurance - Insured Population and Provider Type

Health insurance coverage is considered a *key driver* of health status.

In the report area 6,112 total civilians have some form of health insurance coverage. Of those, 82.49% have private insurance, e.g. insurance purchased through an employer or union, through direct purchase (e.g. on a health exchange) or have Tricare or other military health insurance. In addition, 35.86% have a form of public health insurance. Public health coverage includes the federal programs Medicare, Medicaid, and VA Health Care (provided through the Department of Veterans Affairs), as well as the Children's Health Insurance Program (CHIP). This indicator is relevant because insurance provides access to healthcare, including regular primary care, specialty care, and other health services that prevent poor health status.

Note: Percentages may exceed 100% as individuals may have more than one form of health insurance.

Report Area	Total Population (For Whom Insurance Status is Determined)	Population with Health Insurance	Percentage with Private Insurance	Percentage with Public Insurance
Caribou County, ID	6,932	6,112	82.49%	35.86%
Idaho	1,789,734	1,607,662	77.24%	37.56%
United States	324,818,565	296,329,423	74.32%	38.83%

[View larger map](#)

Insured, Private Insurance, Percent by Tract, ACS 2017-21

## Insurance - Population Receiving Medicaid

This indicator reports the percentage of the population with insurance enrolled in Medicaid (or other means-tested public health insurance). This indicator is relevant because it assesses vulnerable populations which are more likely to have multiple health access, health status, and social support needs; when combined with poverty data, providers can use this measure to identify gaps in eligibility and enrollment.

Report Area	Total Population (For Whom Insurance Status is Determined)	Population with Any Health Insurance	Population Receiving Medicaid	Percent of Insured Population Receiving Medicaid
Caribou County, ID	6,932	6,112	987	16.15%
Idaho	1,789,734	1,607,662	317,365	19.74%
United States	324,818,565	296,329,423	65,752,822	22.19%

## Insurance - Uninsured Population (SAHIE)

The lack of health insurance is considered a *key driver* of health status.

This indicator reports the percentage of adults under age 65 without health insurance coverage. This indicator is relevant because lack of insurance is a primary barrier to healthcare access including regular primary care, specialty care, and other health services that contributes to poor health status.

Report Area	Total Population Age 0-64	Pop. Age 0-64 w/ Insurance	Pop. Age 0-64 w/ Insurance, Percent	Pop. Age 0-64 w/o Insurance	Pop. Age 0-64 w/o Insurance, Percent
Caribou County, ID	5,915	5,295	89.52%	620	10.48%

## Social Capital - Voter Participation Rate

This indicator reports the percentage of the adult population that voted in the national elections on November 2, 2020. Results are preliminary as of December 14, 2020. Voter participation rates are calculated as a percentage of the voting age population (age 18+) and not as a percentage of registered voters. In the 2020 election, of the report area's 4,792 voting age population,

3,416 or 71.3% have cast a vote.

Report Area	Total Citizens Age 18+ (ACS2015-19)	Total Votes Cast	Voter Participation Rate
Caribou County, ID	4,792	3,416	71.3%
Idaho	1,220,310	868,105	71.1%

## Teen Births

This indicator reports the seven-year average number of births per 1,000 female population age 15-19. Data were from the National Center for Health Statistics - Natality files (2014-2020) and are used for the 2022 County Health Rankings.

In the report area, of the 1,644 total female population age 15-19, the teen birth rate is 12.8 per 1,000, which is less than the state's teen birth rate of 18.5.

Note: Data are suppressed for counties with fewer than 10 teen births in the time frame.

Report Area	Female Population Age 15-19	Teen Births, Rate per 1,000 Female Population Age 15-19
Caribou County, ID	1,644	12.8
Idaho	415,469	18.5
United States	72,151,590	19.3

## Property Crime - Total

This indicator reports the rate of property crime offenses reported by law enforcement per 100,000 residents. Property crimes include burglary, larceny-theft, motor vehicle theft, and arson. This indicator is relevant because it assesses community safety.

In the report area, 42 property crimes occurred in 2014 and 2016 (two years). The property crime rate of 625.6 per 100,000 residents is lower than the statewide rate of 1,800.5 per 100,000.

*Note: Data are suppressed for counties if, for both years of available data, the population reported by agencies is less than 50% of the population reported in Census, or if less than 80% of agencies measuring crimes reported data.*

Report Area	Total Population	Property Crimes, Annual Average	Property Crimes, Annual Rate (Per 100,000 Pop.)
Caribou County, ID	6,793	42	625.6
Idaho	1,658,791	29,856	1,800.5
United States	321,015,117	7,915,583	2,466.1

## Physical Environment

A community's health also is affected by the physical environment. A safe, clean environment that provides access to healthy food and recreational opportunities is important to maintaining and improving community health.

### Air & Water Quality - Particulate Matter 2.5

This indicator reports the percentage of days with particulate matter 2.5 levels above the National Ambient Air Quality Standard (35 micrograms per cubic meter) per year, calculated using data collected by monitoring stations and modeled to include counties where no monitoring stations occur. This indicator is relevant because poor air quality contributes to respiratory issues and overall poor health.

Report Area	Total Population (2020)	Average Daily Ambient Particulate Matter 2.5	Days Exceeding Emissions Standards	Days Exceeding Standards, Percent (Crude)	Days Exceeding Standards, Percent (Weighted)
Caribou County, ID	7,027	5.69	0	0.00	0.00%
Idaho	1,839,106	7.15	0	0.00	0.03%
United States	329,148,493	8.26	0	0.00	0.11%

## Climate & Health - Drought Severity

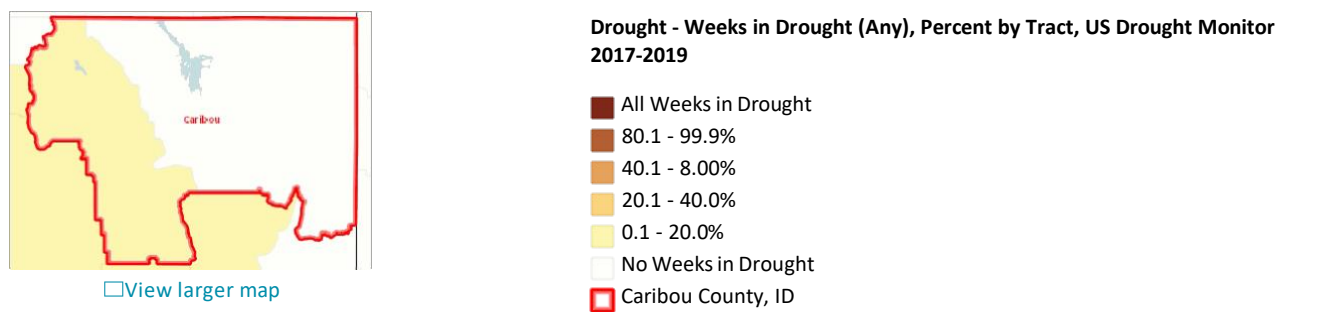

Drought is defined as a moisture deficit bad enough to have social, environmental or economic effects. The Drought Monitor map identifies areas of drought and labels them by intensity<sup>1</sup>. D1 is the least intense level and D4 the most intense. In the report area, 5.46% of weeks during the 2017-2019 period were spent in drought (any level). An additional 30.48% of weeks were categorized spent in "abnormally dry conditions" (D0) indicating that drought could occur, or that the area is recovering from drought but are not yet back to normal.

Report Area	Time Period	Weeks in D0 (Abnormally Dry), Percent	Weeks in D1 (Moderate Drought), Percent	Weeks in D2 (Severe Drought), Percent	Weeks in D3 (Extreme Drought), Percent	Weeks in D4 (Exceptional Drought), Percent	Weeks in Drought (Any), Percent
Caribou County, ID	2017-2019	30.48%	5.46%	0.00%	0.00%	0.00%	5.46%
Idaho	2017-2019	28.98%	7.08%	0.88%	0.00%	0.00%	7.96%

## Climate & Health - National Risk Index

The FEMA National Risk Index provides a holistic view of community-level risk nationwide by combining multiple hazards with socioeconomic and built environment factors. It calculates a baseline relative risk measurement for each United States county and census tract for 18 natural hazard types as a composite score from the summation of all 18 hazard types (as shown in the main table) as well as individual scores for each hazard type (as shown in the breakout tables).

This indicator displays the composite FEMA National Risk Index score and the scores of the three components - Expected Annual Loss, Social Vulnerability, and Community Resilience. All the scores are constrained into a scale ranging from 0 (lowest risk) to 100 (highest risk) describing a community's relative position among all other communities. For example, a county's Risk Index score (as shown in the table below) and rating (as displayed in the map inset) is relative to all other counties in the United States. Similarly, a Census tract's Risk Index score and rating is relative to all other Census tracts in the United States.

*Note: Use caution when comparing data for custom areas to national averages. View methodology for more information.*

Report Area	National Risk Index Score	Expected Annual Loss Score	Social Vulnerability Score	Community Resilience Score
Caribou County, ID	4.69	8.99	24.04	53.22
Idaho	8.97	13.54	32.14	53.92

## Food Environment - Fast Food Restaurants

This indicator reports the number of fast food restaurants per 100,000 population. The prevalence of fast food restaurants provides a measure of both access to healthy food and environmental influences on dietary behaviors. Fast food restaurants

are defined as limited-service establishments primarily engaged in providing food services (except snack and nonalcoholic beverage bars) where patrons generally order or select items and pay before eating.

*Note: Counts of establishments < 3 are suppressed.*

Report Area	Total Population (2020)	Number of Establishments	Establishments, Rate per 100,000 Population
Caribou County, ID	7,027	3	42.69
Idaho	1,839,106	1,225	66.61

## Food Environment - Grocery Stores

Healthy dietary behaviors are supported by access to healthy foods, and Grocery Stores are a major provider of these foods. There are 3 grocery establishments in the report area, a rate of 42.69 per 100,000 population. Grocery stores are defined as supermarkets and smaller grocery stores primarily engaged in retailing a general line of food, such as canned and frozen foods; fresh fruits and vegetables; and fresh and prepared meats, fish, and poultry. Delicatessen-type establishments are also included. Convenience stores and large general merchandise stores that also retail food, such as supercenters and warehouse club stores, are excluded.

Report Area	Total Population (2020)	Number of Establishments	Establishments, Rate per 100,000 Population
Caribou County, ID	7,027	3	42.69
Idaho	1,839,106	264	14.35
United States	331,449,275	62,268	18.79

## Food Environment - Low Food Access

This indicator reports the percentage of the population with low food access. Low food access is defined as living more than 1 mile (urban) or 10 miles (rural) from the nearest supermarket, supercenter, or large grocery store. Data are from the 2019 Food Access Research Atlas dataset. This indicator is relevant because it highlights populations and geographies facing food insecurity.

5.39% of the total population in the report area have low food access. The total population in the report area with low food access is 375.

Report Area	Total Population (2010)	Population with Low Food Access	Percent Population with Low Food Access
Caribou County, ID	6,963	375	5.39%
Idaho	1,567,582	403,898	25.77%
United States	308,745,538	68,611,398	22.22%

## Food Environment - SNAP-Authorized Food Stores

This indicator reports the number of SNAP-authorized food stores as a rate per 10,000 population. SNAP-authorized stores include grocery stores as well as supercenters, specialty food stores, and convenience stores that are authorized to accept SNAP (Supplemental Nutrition Assistance Program) benefits. The report area contains a total of 6 SNAP-authorized retailers with a rate of 8.42.

Report Area	Total Population (2020)	Total SNAP-Authorized Retailers	SNAP-Authorized Retailers, Rate per 10,000 Population
Caribou County, ID	7,123	6	8.42
Idaho	1,826,689	1,110	6.08

## Clinical Care and Prevention

A lack of access to care presents barriers to good health. Supply of facilities and physicians, the rate of uninsurance, financial hardship, transportation barriers, cultural competency, and coverage limitations affect access.

Rates of morbidity, mortality, and emergency hospitalizations can be reduced if community residents access services such as health screenings, routine tests, and vaccinations. Prevention indicators can call attention to a lack of access or knowledge regarding one or more health issues and can inform program interventions.

## Cancer Screening - Cervical Cancer Screening

This indicator reports the percentage of females age 21–65 years who report having had recommended cervical cancer screening test.

Within the report area there are 79.50% women age 21-65 who have had recommended cervical cancer screening test of the total female population age 21-65.

Report Area	Total Population (2020)	Females Age 21-65 with Cervical Cancer Screening Test (Crude)	Females Age 21-65 with Recent Pap Smear (Age-Adjusted)

### Prevention - Recent Primary Care Visit (Medicare)

This indicator reports the percentage of Medicare enrollees who self-report having at least one routine check-up with a doctor in the past 12 months. Data is obtained from the Dartmouth Atlas Data - Selected Primary Care Access and Quality Measures (2008-2019). This indicator is relevant because engaging in preventive behaviors allows for early detection and treatment of health problems. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

Of the 1,127 Medicare enrollees in the report area, 930 or 82.52% reported a recent primary care visit as of year 2019.

Report Area	Medicare Enrollees	Medicare Enrollees with Recent Primary Care Visit	Medicare Enrollees with Recent Primary Care Visit, Percent
Caribou County, ID	1,127	930	82.52%

### Readmissions - All Cause (Medicare Population)

This indicator reports the number and rate of 30-day hospital readmissions among Medicare beneficiaries age 65 and older. Hospital readmissions are unplanned visits to an acute care hospital within 30 days after discharge from a hospitalization. Patients may have unplanned readmissions for any reason, however readmissions within 30 days are often related to the care received in the hospital, whereas readmissions over a longer time period have more to do with other complicating illnesses, patients' own behavior, or care provided to patients after hospital discharge<sup>1</sup>.

In the latest reporting period there were 1,398 Medicare beneficiaries in the report area. 27, or 12.2% of hospitalizations resulted in a 30-day hospital readmission. The rate of readmissions in the report area was lower than the state rate of 13.0% during the same time period.

Report Area	Medicare Part A and B Beneficiaries	30-Day Hospital Readmissions	30-Day Hospital Readmissions, Rate
Caribou County, ID	1,398	27	12.2%
Idaho	334,470	3,822	13.0%
United States	58,738,711	1,212,308	18.1%

Note: This indicator is compared to the state average.

## Health Behaviors

Health behaviors such as poor diet, a lack of exercise, and substance abuse contribute to poor health status.

### Alcohol - Heavy Alcohol Consumption

In the report area, 988, or 19.19% adults self-report excessive drinking in the last 30 days, which is less than the state rate of 19.56%. Data for this indicator were based on survey responses to the 2019 Behavioral Risk Factor Surveillance System (BRFSS) annual survey and are used for the 2022 County Health Rankings.

Excessive drinking is defined as the percentage of the population who report at least one binge drinking episode involving five or more drinks for men and four or more for women over the past 30 days, or heavy drinking involving more than two drinks per day for men and more than one per day for women, over the same time period. Alcohol use is a behavioral health issue that is also a risk factor for a number of negative health outcomes, including: physical injuries related to motor vehicle accidents, stroke, chronic diseases such as heart disease and cancer, and mental health conditions such as depression and suicide. There are a number of evidence-based interventions that may reduce excessive/binge drinking; examples include raising taxes on alcoholic beverages, restricting access to alcohol by limiting days and hours of retail sales, and screening and counseling for alcohol abuse (Centers for Disease Control and Prevention, Preventing Excessive Alcohol Use, 2020).

Report Area	Population Age 18+	Adults Reporting Excessive Drinking	Percentage of Adults Reporting Excessive Drinking
Caribou County, ID	5,152	988	19.19%
Idaho	1,340,299	262,130	19.56%
United States	255,778,123	50,612,058	19.79%

Note: This indicator is compared to the state average.

## Physical Inactivity

Within the report area, 1,039 or 20.1% of adults aged 20 and older self-report no active leisure time, based on the question: "During the past month, other than your regular job, did you participate in any physical activities or exercises such as running, calisthenics, golf, gardening, or walking for exercise?" This indicator is relevant because current behaviors are determinants of future health and this indicator may illustrate a cause of significant health issues, such as obesity and poor cardiovascular health.

Note: In 2021, the CDC updated the methodology used to produce estimates for this indicator. Estimated values for prior years (2004 - 2017) have been updated in this platform to allow comparison across years. Use caution when comparing with saved assessments generated prior to November 10, 2021.

Report Area	Population Age 20+	Adults Age 20+ with No Leisure Time Physical Activity	Adults Age 20+ with No Leisure Time Physical Activity, Percent
Caribou County, ID	4,901	1,039	20.1%

## Health Outcomes

Measuring morbidity and mortality rates allows assessing linkages between social determinants of health and outcomes. By comparing, for example, the prevalence of certain chronic diseases to indicators in other categories (e.g., poor diet and exercise) with outcomes (e.g., high rates of obesity and diabetes), various causal relationship may emerge, allowing a better understanding of how certain community health needs may be addressed.

### Cancer Incidence - All Sites

This indicator reports the age adjusted incidence rate (cases per 100,000 population per year) of cancer (all sites) adjusted to 2000 U.S. standard population age groups (Under age 1, 1-4, 5-9, ..., 80-84, 85 and older).

Within the report area, there were 38 new cases of cancer reported. This means there is a rate of 446.5 for every 100,000 total population.

Report Area	Estimated Total Population	New Cases (Annual Average)	Cancer Incidence Rate (Per 100,000 Population)
Caribou County, ID	8,510	38	446.5

#### Pedestrian Motor Vehicle Crash Mortality, Rate (Per 100,000 Pop.) by County, NHTSA 2016-2020

## Mortality - Premature Death

This indicator reports the Years of Potential Life Lost (YPLL) before age 75 per 100,000 population for all causes of death. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. YPLL measures premature death and is calculated by subtracting the age of death from the 75 year benchmark. Data were from the National Center for Health Statistics - Mortality Files (2018-2020) and are used for the 2022 County Health Rankings. This indicator is relevant because a measure of premature death can provide a unique and comprehensive look at overall health status.

Within the report area, there are a total of 79 premature deaths from 2018 to 2020. This represents an age-adjusted rate of 5,852 years potential life lost before age 75 per every 100,000 total population.

*Note: Data are suppressed for counties with fewer than 20 deaths in the three-year time frame.*

Report Area	Premature Deaths, 2018-2020	Years of Potential Life Lost, 2018-2020	Years of Potential Life Lost, Rate per 100,000 Population
Caribou County, ID	79	1,156	5,852

Premature Death (YPLL), Years Lost Rate (Per 100,000 Pop.) by County, CDC NVSS 2018-2020

## Poor Mental Health

This indicator reports the percentage of adults age 18 and older who report 14 or more days during the past 30 days during which their mental health was not good.

Within the report area, there were 13.30% of adults 18 and older who reported poor mental health in the past month of the total population age 18 and older.

Report Area	Total Population (2020)	Adults Age 18+ with Poor Mental Health (Crude)	Adults Age 18+ with Poor Mental Health (Age-Adjusted)
Caribou County, ID	7,123	13.30%	14.20%
Idaho	1,826,913	13.32%	13.83%

## Stroke (Medicare Population)

This indicator reports the number and percentage of the Medicare Fee-for-Service population diagnosed with stroke. Data are based upon Medicare administrative enrollment and claims data for Medicare beneficiaries enrolled in the Fee-for-Service program.

Within the report area, there are a total of 29 beneficiaries diagnosed with stroke. This represents a 2.3% of the survey population.

Report Area	Total Medicare Fee-for-Service Beneficiaries	Beneficiaries Diagnosed with Stroke	Percent Diagnosed with Stroke
Caribou County, ID	1,249	29	2.3%
Idaho	197,580	4,515	2.3%

#### Beneficiaries with Stroke, Percent by County, CMS 2018

## Healthcare Workforce

A lack of access to care presents barriers to good health. The supply and accessibility of facilities and physicians, the rate of uninsurance, financial hardship, transportation barriers, cultural competency, and coverage limitations affect access.

Rates of morbidity, mortality, and emergency hospitalizations can be reduced if community residents access services such as health screenings, routine tests, and vaccinations. Prevention indicators can call attention to a lack of access or knowledge regarding one or more health issues and can inform program interventions.

## Access to Care - Dental Health

This indicator reports the number of dentists in the report area as a rate per 100,000 total population. This indicator includes all dentists - qualified as having a doctorate in dental surgery (D.D.S.) or dental medicine (D.M.D.), who are licensed by the state to practice dentistry and who are practicing within the scope of that license. Data from the 2020 Area Health Resources File (AHRF) are used in the 2022 County Health Rankings.

Within the report area there are 5 dentists. This represents 70.2 providers per 100,000 total population.

*Note: Data are suppressed for counties with population greater than 4,000 and 0 dentists.*

Report Area	Estimated Population	Number of Dentists	Ratio of Dental Providers to Population (1 Provider per x Persons)	Dentists, Rate (Per 100,000 Population)

## Population Living in a Health Professional Shortage Area

This indicator reports the percentage of the population that is living in a geographic area designated as a "Health Professional Shortage Area" (HPSA), defined as having a shortage of primary medical care, dental or mental health professionals. This indicator is relevant because a shortage of health professionals contributes to access and health status issues.

Within the report area, there are 2,125 people living in a Health Professional Shortage Area of primary care, dental or mental health professionals. This represents 30.34% of the total population.

Report Area	Total Population (ACS 2021 5-Year Estimates)	Population Living in an Area Affected by a HPSA	Percentage of Population Living in an Area Affected by a HPSA	Percentage of HPSA Population Underserved
Caribou County, ID	7,003	2,125	30.34%	56.24%
Idaho	1,811,617	553,673	30.56%	45.32%
United States	329,725,481	78,402,533	23.78%	53.33%

## Special Topics - COVID-19

Indicators in this section are part of a series of rotating special topics. These indicators are publicly available to all users to help inform response to current events.

### COVID-19 - Confirmed Cases

This indicator reports incidence rate of confirmed COVID-19 cases per 100,000 population. Data for this indicator are updated daily and derived from the Johns Hopkins University data feed.

In the report area, there have been 1,664 total confirmed cases of COVID-19. The rate of confirmed cases is 23,569.41 per 100,000 population, which is less than the state average of 29,553.51. Data are current as of 02/28/2023.

Report Area	Total Population	Total Confirmed Cases	Confirmed Cases, Rate per 100,000 Population	Last Update

## **APPENDIX 6: DEMOGRAPHICS + HEALTH OUTCOMES AND HEALTH FACTORS DATA – WORSE THAN IDAHO STATE DATA**

Appendix 5 contains the “better than” Idaho state data while Appendix 6 reflects the “worse than” Idaho state data. The information presented in this Appendix reflects the framework used by the County Health Rankings & Roadmaps program, a collaborative between the Robert Wood Johnson Foundation and the University of Wisconsin Population Health Institute. The data presented in this Appendix uses the following outline for the report.

- Demographics
- Income and Economics
- Education
- Housing and Families
- Other Social and Economic Factors
- Physical Environment
- Clinical Care and Prevention
- Health Behaviors
- Health Outcomes
- Healthcare Workforce
- Special Topics – COVID-19

## Demographics

Current population demographics and changes in demographic composition over time play a determining role in the types of health and social services needed by communities.

### Total Population Change, 2010 - 2020

According to the United States Census Bureau Decennial Census, between 2010 and 2020 the population in the report area grew by 64 persons, a change of 0.92%. A significant positive or negative shift in total population over time impacts healthcare providers and the utilization of community resources.

Report Area	Total Population, 2010 Census	Total Population, 2020 Census	Population Change, 2010-2020	Population Change, 2010-2020, Percent
Caribou County, ID	6,963	7,027	64	0.92%
Idaho	1,567,579	1,839,106	271,527	17.32%
United States	312,471,161	334,735,155	22,263,994	7.13%

## Income and Economics

Economic and social insecurity often are associated with poor health. Poverty, unemployment, and lack of educational achievement affect access to care and a community's ability to engage in healthy behaviors. Without a network of support and a safe community, families cannot thrive. Ensuring access to social and economic resources provides a foundation for a healthy community.

### Commuter Travel Patterns - Overview

This indicator shows the method of transportation workers used to travel to work for the report area. Of the 3,250 workers in the report area, 78.4% drove to work alone while 14.9% carpoolled. 0.0% of all workers reported that they used some form of public transportation, while others used some optional means including 1.9% walking or riding bicycles, and 1.3% used taxicabs to travel to work.

Report Area	Workers 16 and Up	Percent Drive Alone	Percent Carpool	Percent Public Transportation	Percent Bicycle or Walk	Percent Taxi or Other	Percent Work at Home
Caribou County, ID	3,250	78.4%	14.9%	0.0%	1.9%	1.3%	3.5%
Idaho	836,154	76.9%	9.1%	0.6%	3.1%	1.1%	9.3%

Caribou County, ID

## Employment - Unemployment Rate

Total unemployment in the report area for the current month equals 110, or 2.7% of the civilian non-institutionalized population age 16 and older (non-seasonally adjusted). This indicator is relevant because unemployment creates financial instability and barriers to access including insurance coverage, health services, healthy food, and other necessities that contribute to poor health status.

Report Area	Labor Force	Number Employed	Number Unemployed	Unemployment Rate
Caribou County, ID	4,137	4,027	110	2.7%
Idaho	958,570	936,022	22,548	2.4%
United States	165,456,929	160,031,490	5,425,440	3.3%

[View larger map](#)

#### Unemployment, Rate by County, BLS 2022 - December

## Income - Per Capita Income

The per capita income for the report area is \$27,357. This includes all reported income from wages and salaries as well as income from self-employment, interest or dividends, public assistance, retirement, and other sources. The per capita income in this report area is the average (mean) income computed for every man, woman, and child in the specified area.

Report Area	Total Population	Total Income (\$)	Per Capita Income (\$)
Caribou County, ID	7,003	\$191,581,800	<b>\$27,357</b>
Idaho	1,811,617	\$57,082,742,200	\$31,509
United States	329,725,481	\$12,410,089,038,400	\$37,637

Note: This indicator is compared to the state average.

Data Source: US Census Bureau, [American Community Survey](#). 2017-21. Source geography: Tract

#### Per Capita Income (\$)

[View larger map](#)

#### Per Capita Income by Tract, ACS 2017-21

## Poverty - Children Eligible for Free/Reduced Price Lunch

Free or reduced price lunches are served to qualifying students in families with income between under 185 percent (reduced price) or under 130 percent (free lunch) of the US federal poverty threshold as part of the federal National School Lunch Program (NSLP).

Out of 1,475 total public school students in the report area, 482 were eligible for the free or reduced price lunch program in the latest report year. This represents 32.7% of public school students, which is higher than the state average of 31.7%.  
*Note: States with more than 80% records "not reported" are suppressed for all geographic areas, including hospital service area, census tract, zip code, school district, county, state, etc.*

Report Area	Total Students	Students Eligible for Free or Reduced Price Lunch	Students Eligible for Free or Reduced Price Lunch, Percent
Caribou County, ID	1,475	482	32.7%
Idaho	303,496	95,924	31.7%
United States	42,378,208	22,336,198	53.2%

Note: This indicator is compared to the state average.

[View larger map](#)

#### Students Eligible for Free or Reduced-Price Lunch, NCES CCD 2020-21

## Education

This category contains indicators that describe the education system and the educational outcomes of report area populations. Education metrics can be used to describe variation in population access, proficiency, and attainment throughout the education system, from access to pre-kindergarten through advanced degree attainment. These indicators are important because education is closely tied to health outcomes and economic opportunity.

### Access - Preschool Enrollment (Age 3-4)

This indicator reports the percentage of the population age 3-4 that is enrolled in school. This indicator helps identify places where preschool opportunities are either abundant or lacking in the educational system.

Report Area	Population Age 3-4	Population Age 3-4 Enrolled in School	Population Age 3-4 Enrolled in School, Percent
Caribou County, ID	151	35	23.18%
Idaho	48,938	16,975	34.69%
United States	8,100,136	3,719,992	45.93%

#### Enrollment in School, Children (Age 3-4), Percent by Tract, ACS 2017-21

Attainment - Overview

Educational Attainment shows the distribution of the highest level of education achieved in the report area, and helps schools and businesses to understand the needs of adults, whether it be workforce training or the ability to develop science, technology, engineering, and mathematics opportunities. Educational attainment is calculated for persons over 25 years old, and is an estimated average for the period from 2016 to 2021. For the selected area, 13.0% have at least a college bachelor’s degree, while 28.8% stopped their formal educational attainment after high school.

Report Area	No High School Diploma	High School Only	Some College	Associates Degree	Bachelors Degree	Graduate or Professional Degree
Caribou County, ID	10.31%	28.8%	30.6%	11.3%	13.0%	5.9%
Idaho	8.83%	26.5%	25.6%	9.9%	19.5%	9.6%

## Attainment - Overview

Caribou County, ID

## Attainment - Associate's Level Degree or Higher

30.23% of the population aged 25 and older, or 1,349 have obtained an Associate's level degree or higher. This indicator is relevant because educational attainment has been linked to positive health outcomes.

Report Area	Total Population Age 25+	Population Age 25+ with Associate's Degree or Higher	Percent Population Age 25+ with Associate's Degree or Higher
Caribou County, ID	4,462	1,349	30.23%

## Attainment - No High School Diploma

Within the report area there are 460 persons aged 25 and older without a high school diploma (or equivalency) or higher. This represents 10.31% of the total population aged 25 and older. This indicator is relevant because educational attainment is linked to positive health outcomes ([Freudenberg & Ruglis, 2007](#)).

Report Area	Total Population Age 25+	Population Age 25+ with No High School Diploma	Population Age 25+ with No High School Diploma, Percent
Caribou County, ID	4,462	460	10.31%

#### Population with No High School Diploma (Age 25+), Percent by Tract, ACS 2017-21

## Chronic Absence Rate

In the report area 3.47% or 51 children were chronically absent (missing 15 or more school days) during the 2017-18 school year. This indicator is important because chronic absence can jeopardizes students' academic proficiency, social engagement, and opportunities for long-term success ([NEA, 2018](#)).

Report Area	Student Cohort	Number Chronically Absent	Chronic Absence Rate
Caribou County, ID	1,468	51	3.47%
Idaho	295,694	9,000	3.04%
United States	48,381,525	7,677,828	15.87%

Note: This indicator is compared to the state average.

#### Chronic Absenteeism, Children Enrolled in Public Schools, Rate by School District, CRDC 2017-18

## Housing and Families

This category contains indicators that describe the structure of housing and families, and the condition and quality of housing units and residential neighborhoods. These indicators are important because housing issues like overcrowding and affordability have been linked to multiple health outcomes, including infectious disease, injuries, and mental disorders. Furthermore, housing metrics like home-ownership rates and housing prices are key for economic analysis.

## Household Structure - Older Adults Living Alone

This indicator reports the percentage of households occupied by a single older adult (age 65+). This indicator is important because older adults who live alone are vulnerable populations who may have challenges accessing basic needs, including health needs.

Report Area	Total Occupied Households	Total Households with Seniors (Age 65+)	Households with Seniors Living Alone	Percentage of Total Households	Percentage of Senior Households
Caribou County, ID	2,470	824	329	13.32%	<b>39.93%</b>
Idaho	657,101	199,139	70,336	10.70%	35.32%

## Other Social & Economic Factors

Economic and social insecurity often are associated with poor health. Poverty, unemployment, and lack of educational achievement affect access to care and a community's ability to engage in healthy behaviors. Without a network of support and a safe community, families cannot thrive. Ensuring access to social and economic resources provides a foundation for a healthy community.

## Area Deprivation Index

This indicator reports the average (population weighted) Area Deprivation Index (ADI) for the selected area. The Area Deprivation Index ranks neighborhoods and communities relative to all neighborhoods across the nation (National Percentile) or relative to other neighborhoods within just one state (State Percentile). The ADI is calculated based on 17 measures related to four primary domains (Education; Income & Employment; Housing; and Household Characteristics). The overall scores are measured on a scale of 1 to 100 where 1 indicates the lowest level of deprivation (least disadvantaged) and 100 is the highest level of deprivation (most disadvantaged).

Report Area	Total Population (2020)	State Percentile	National Percentile
Caribou County, ID	7,027	81	<b>66</b>
Idaho	1,839,106	No data	47
United States	334,735,155	No data	No data

Note: This indicator is compared to the state average.

## Households with No Computer

This indicator reports the percentage of households who don't own or use any types of computers, including desktop or laptop, smartphone, tablet or other portable wireless computer, and some other type of computer, based on the 2017-2021 American Community Survey estimates. Of the 2,470 total households in the report area, 144 or 5.83% are without a computer.

*Note: The ACS2017-21 questions about internet/computer usage are not asked for the group quarters population, so data do not include people living in housing such as dorms, prisons, nursing homes, etc.*

Report Area	Total Households	Households with No Computer	Households with No Computer, Percent
Caribou County, ID	2,470	144	5.83%
Idaho	657,101	37,995	5.78%
United States	124,010,992	8,613,533	6.95%

## Insurance - Uninsured Population (ACS)

The lack of health insurance is considered a *key driver* of health status.

In the report area 11.83% of the total civilian non-institutionalized population are without health insurance coverage. The rate of uninsured persons in the report area is greater than the state average of 10.17%. This indicator is relevant because lack of insurance is a primary barrier to healthcare access including regular primary care, specialty care, and other health services that contributes to poor health status.

Report Area	Total Population (For Whom Insurance Status is Determined)	Uninsured Population	Uninsured Population, Percent
Caribou County, ID	6,932	820	11.83%
Idaho	1,789,734	182,072	10.17%
United States	324,818,565	28,489,142	8.77%

Note: This indicator is compared to the state average.

Uninsured Population, Percent by Tract, ACS 2017-21

## Physical Environment

A community's health also is affected by the physical environment. A safe, clean environment that provides access to healthy food and recreational opportunities is important to maintaining and improving community health.

## Community Design - Broadband Internet Access

This indicator reports the percentage of population with access to high-speed internet. Data are based on the reported service area of providers offering download speeds of 25 MBPS or more and upload speeds of 3 MBPS or more. These data represent both wireline and fixed/terrestrial wireless internet providers. Cellular internet providers are not included.

Report Area	Total Number of Broadband Serviceable Locations	Access to DL Speeds >= 25MBPS and UL Speeds >= 3 MBPS	Access to DL Speeds >= 100MBPS and UL Speeds >= 20 MBPS
Caribou County, ID	3,931	75.55%	15.92%
Idaho	712,305	84.92%	74.44%
United States	113,499,990	92.88%	87.63%

Note: This indicator is compared to the state average.

## Clinical Care and Prevention

A lack of access to care presents barriers to good health. Supply of facilities and physicians, the rate of uninsurance, financial hardship, transportation barriers, cultural competency, and coverage limitations affect access.

Rates of morbidity, mortality, and emergency hospitalizations can be reduced if community residents access services such as health screenings, routine tests, and vaccinations. Prevention indicators can call attention to a lack of access or knowledge regarding one or more health issues and can inform program interventions.

### Cancer Screening - Mammogram (Medicare)

This indicator reports the percentage of female Medicare beneficiaries age 35 and older who had a mammogram in most recent reporting year. The American Cancer Society recommends that women age 45 to 54 should get a mammogram every year, and women age 55 and older should get a mammogram every other year. In the latest reporting period there were 1,355 Medicare beneficiaries in the report area, and 27% of female beneficiaries age 35 or older had a mammogram in the past year. The rate in the report area was lower than the state rate of 30% during the same time period.

Report Area	Medicare Beneficiaries	Female Beneficiaries with Recent Mammogram, Percent
Caribou County, ID	1,355	27%
Idaho	319,534	30%
United States	57,235,207	33%

Note: This indicator is compared to the state average.

### Dental Care Utilization

This indicator reports the percentage of adults age 18 and older who report having been to the dentist or dental clinic in the previous year.

Within the report area there are 64.00% adults age 18+ who went to the dentist in the past year of the total population age 18+.

Report Area	Total Population (2020)	Adults Age 18+ with Recent Dental Visit (Crude)	Adults Age 18+ with Recent Dental Visit (Age-Adjusted)
Caribou County, ID	7,123	64.00%	63.40%
Idaho	1,826,913	65.7%	65.4%
United States	331,449,281	64.8%	64.5%

## Diabetes Management - Hemoglobin A1c Test

This indicator reports the percentage of diabetic Medicare patients who have had a hemoglobin A1c (hA1c) test, a blood test which measures blood sugar levels, administered by a health care professional in the past year. Data is obtained from the Dartmouth Atlas Data - Selected Primary Care Access and Quality Measures (2008-2019). This indicator is relevant because engaging in preventive behaviors allows for early detection and treatment of health problems. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

As of year 2019, 80 or 80.00% Medicare enrollees with diabetes have had an annual exam out of 100 Medicare enrollees with diabetes in the report area.

Report Area	Medicare Enrollees with Diabetes	Medicare Enrollees with Diabetes with Annual Exam	Medicare Enrollees with Diabetes with Annual Exam, Percent
Caribou County, ID	100	80	80.00%
Idaho	17,498	14,800	84.58%
United States	6,792,740	5,945,988	87.53%

## Hospitalizations - Preventable Conditions

This indicator reports the preventable hospitalization rate among Medicare beneficiaries for the latest reporting period. Preventable hospitalizations include hospital admissions for one or more of the following conditions: diabetes with short-term complications, diabetes with long-term complications, uncontrolled diabetes without complications, diabetes with lower-extremity amputation, chronic obstructive pulmonary disease, asthma, hypertension, heart failure, bacterial pneumonia, or urinary tract infection. Rates are presented per 100,000 beneficiaries. In the latest reporting period there were 1,355 Medicare beneficiaries in the report area. The preventable hospitalization rate was 2,441. The rate in the report area was higher than the state rate of 1,813 during the same time period.

Report Area	Medicare Beneficiaries	Preventable Hospitalizations, Rate per 100,000 Beneficiaries
Caribou County, ID	1,355	2,441
Idaho	319,534	1,813
United States	57,235,207	2,865

[View larger map](#)

Preventable Hospitalization, Medicare Beneficiaries, Rate by County, CMS 2020

## Hospitalizations - Emergency Room Visits

This indicator reports the number and rate of emergency room (ER) visits among Medicare beneficiaries age 65 and older. This indicator is relevant because emergency room visits are "high intensity" services that can burden on both health care systems and patients. High rates of emergency room visits "may indicate poor care management, inadequate access to care or poor patient choices, resulting in ED visits that could be prevented"<sup>1</sup>.

In the latest reporting period there were 1,398 Medicare beneficiaries in the report area. Beneficiaries had 683 emergency room visits, and the rate of visits per 1,000 beneficiaries was 511.0. The ER visit rate in the report area was higher than the state rate of 479.0 during the same time period.

Report Area	Medicare Part A and B Beneficiaries	Emergency Room Visits	Emergency Room Visits, Rate (per 1,000 Beneficiaries)
Caribou County, ID	1,398	683	511.0
Idaho	334,470	94,926	479.0
United States	58,738,711	17,332,356	535.0

## Prevention - Annual Wellness Exam (Medicare)

This indicator reports the percentage of Medicare beneficiaries who had one or more annual wellness visits in most recent reporting year. Annual wellness visits are visits to develop or update a personalized prevention plan and perform a health risk assessment. These services are fully covered once every 12 months. In the latest reporting period there were 1,355 Medicare beneficiaries in the report area, and 25% had an annual wellness visit. The rate in the report area was lower than the state rate of 31% during the same time period.

Report Area	Medicare Beneficiaries	Beneficiaries with Annual Wellness Visit, Percent
Caribou County, ID	1,355	25%
Idaho	319,534	31%
United States	57,235,207	30%

Note: This indicator is compared to the state average.

## Prevention - Seasonal Influenza Vaccine

The most recent data from the report area show that 35.80% of adults aged 18 and older reported receiving an influenza vaccination in the past 12 months. The immunization rate in the report area was lower than the state rate of 37.00% during the same time period. These data are obtained from the Centers for Disease Control and Prevention (CDC) FluVaxView data portal.

Note: The county-level estimates within FluVaxView are derived from responses to the 2019 BRFSS. State and national estimates in the table below are aggregated from county-level values.

Report Area	Total Population (2019)	Percentage of Adults with Recent Influenza Immunization
Caribou County, ID	7,155	35.80%
Idaho	1,787,065	37.00%
United States	319,357,333	41.90%

## Prevention - Core Preventative Services for Men

This indicator reports the percentage of males age 65 years and older who report that they are up to date on a core set of clinical preventive services. Services include: an influenza vaccination in the past year; a PPV ever; and either a fecal occult blood test (FOBT) within the past year, a sigmoidoscopy within the past 5 years and a FOBT within the past 3 years, or a colonoscopy within the past 10 years.

Within the report area there are 38.50% men age 65 and older who had core preventative services in the last one to 10 years of the total male population age 65+.

Report Area	Total Population (2020)	Males Age 65+ Up to Date on Core Preventative Services (Crude)	Males Age 65+ Up to Date on Core Preventative Services (Age-Adjusted)
Caribou County, ID	7,123	38.50%	38.60%

## Health Behaviors

Health behaviors such as poor diet, a lack of exercise, and substance abuse contribute to poor health status.

### Tobacco Usage - Current Smokers

This indicator reports the percentage of adults age 18 and older who report having smoked at least 100 cigarettes in their lifetime and currently smoke every day or some days.

Within the report area there are 16.60% adults age 18+ who have smoked and currently smoke of the total population age 18+.

Report Area	Total Population (2020)	Adults Age 18+ as Current Smokers (Crude)	Adults Age 18+ as Current Smokers (Age-Adjusted)
Caribou County, ID	7,123	16.60%	17.30%
Idaho	1,826,913	15.26%	15.84%

## Health Outcomes

Measuring morbidity and mortality rates allows assessing linkages between social determinants of health and outcomes. By comparing, for example, the prevalence of certain chronic diseases to indicators in other categories (e.g., poor diet and exercise) with outcomes (e.g., high rates of obesity and diabetes), various causal relationship may emerge, allowing a better understanding of how certain community health needs may be addressed.

### Birth Outcomes - Low Birth Weight (CDC)

This indicator reports the percentage of live births where the infant weighed less than 2,500 grams (approximately 5 lbs., 8 oz.). These data are reported for a 7-year aggregated time period. Data were from the National Center for Health Statistics - Natality Files (2014-2020) and are used for the 2022 County Health Rankings.

Within the report area, there were 55 infants born with low birth weight. This represents 8.7% of the total live births.

Note: Data are suppressed for counties with fewer than 10 low birthweight births in the reporting period.

Report Area	Total Live Births	Low Birthweight Births	Low Birthweight Births, Percentage
Caribou County, ID	635	55	8.7%
Idaho	155,302	10,630	6.8%
United States	26,896,859	2,203,029	8.2%

## Chronic Conditions - Diabetes Prevalence (Adult)

This indicator reports the number and percentage of adults age 20 and older who have ever been told by a doctor that they have diabetes. This indicator is relevant because diabetes is a prevalent problem in the U.S.; it may indicate an unhealthy lifestyle and puts individuals at risk for further health issues.

Within the report area, 516 of adults age 20 and older have diabetes. This represents 8.9% of all the adults age 20+.

Note: In 2021, the CDC updated the methodology used to produce estimates for this indicator. Estimated values for prior years (2004 - 2017) have been updated in this platform to allow comparison across years. Use caution when comparing with saved assessments generated prior to November 10, 2021.

Report Area	Population Age 20+	Adults Age 20+ with Diagnosed Diabetes	Adults Age 20+ with Diagnosed Diabetes, Age-Adjusted Rate
Caribou County, ID	4,914	516	8.9%
Idaho	1,291,602	125,316	8.6%

## Mortality - Heart Disease

This indicator reports the 2016-2020 five-year average rate of death due to heart disease (ICD10 Codes I00-I09, I11, I13, I20-I151) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummairized for report areas from county level data, only where data is available. This indicator is relevant because heart disease is a leading cause of death in the United States.

Within the report area, there are a total of 80 deaths due to heart disease. This represents an age-adjusted death rate of 172.7 per every 100,000 total population.

Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.

Report Area	Total Population, 2016-2020 Average	Five Year Total Deaths, 2016-2020 Total	Crude Death Rate (Per 100,000 Population)	Age-Adjusted Death Rate (Per 100,000 Population)
Caribou County, ID	7,052	80	226.9	172.7
Idaho	1,753,654	15,427	175.9	156.4
United States	326,747,554	3,294,101	201.6	164.8

## Mortality - Life Expectancy

This indicator reports the average life expectancy at birth (age-adjusted to 2000 standard). Data were from the National Center for Health Statistics - Mortality Files (2018-2020) and are used for the 2022 County Health Rankings.

Of the total 6,581 population in the report area, the average life expectancy during the 2018-20 three-year period is 78.7, which is lower than the statewide rate of 79.2.

*Note: Data are suppressed for counties with fewer than 5,000 population-years-at-risk in the time frame.*

Report Area	Total Population	Life Expectancy at Birth (2018-20)

Life Expectancy at Birth, 2018-2020

Life Expectancy, Years by County, CDC NVSS 2018-2020

## Mortality - Life Expectancy (Census Tract)

This indicator reports the average life expectancy at birth. Life expectancy measures the average number of years from birth a person can expect to live, according to the current mortality experience (age-specific death rates) of the population. Life expectancy takes into account the number of deaths in a given time period and the average number of people at risk of dying during that period, allowing us to compare data across census tracts with different population sizes.

Within the report area, the average life expectancy at birth is 77.75 of the total population.

*Note: Data are suppressed for areas with fewer than 5,000 total population (pooled) during the study period.*

Report Area	Total Population (2010-2015)	Life Expectancy at Birth (2010-2015)
Caribou County, ID	6,808	<b>77.75</b>
Idaho	1,616,547	79.36
United States	320,098,094	78.69

## Mortality - Lung Disease

This indicator reports the 2016-2020 five-year average rate of death due to chronic lower respiratory disease per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummized for report areas from county level data, only where data is available. This indicator is relevant because lung disease is a leading cause of death in the United States.

Within the report area, there are a total of 38 deaths due to lung disease. This represents an age-adjusted death rate of 81.2 per every 100,000 total population.

*Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.*

Report Area	Total Population, 2016-2020 Average	Five Year Total Deaths, 2016-2020 Total	Crude Death Rate (Per 100,000 Population)	Age-Adjusted Death Rate (Per 100,000 Population)
Caribou County, ID	7,052	38	107.8	81.2

#### Motor Vehicle Crash Mortality, Rate (Per 100,000 Pop.) by County, NHTSA 2016-2020

## Mortality - Motor Vehicle Crash, Alcohol-Involved

Motor vehicle crash deaths are preventable and are a leading cause of death among young persons. This indicator reports the crude rate of persons killed in motor vehicle crashes involving alcohol as a rate per 100,000 population. Fatality counts are based on the location of the crash and not the decedent's residence.

Within the report area, there are a total of 2 deaths due to motor vehicle crash involving alcohol. The crude rate per 100,000 total population is 5.7.

Note: Fatality counts are based on the location of the crash and not the decedent's residence.

Report Area	Total Population (2020)	Alcohol-Involved Crash Deaths (2016-2020)	Alcohol-Involved Crash Deaths, Annual Rate per 100,000 Population
Caribou County, ID	7,027	2	5.7

## Obesity

This indicator reports the number and percentage of adults aged 20 and older self-report having a Body Mass Index (BMI) greater than 30.0 (obese). Respondents were considered obese if their Body Mass Index (BMI) was 30 or greater. Body mass index (weight [kg]/height [m]<sup>2</sup>) was derived from self-report of height and weight. Excess weight may indicate an unhealthy lifestyle and puts individuals at risk for further health issues.

Within the report area, there are a total of 1,512 adults age 20 and older who self-reported having a BMI greater than 30.0. This represents a 30.8% of the survey population.

*Note: In 2021, the CDC updated the methodology used to produce estimates for this indicator. Estimated values for prior years (2004 - 2017) have been updated in this platform to allow comparison across years. Use caution when comparing with saved assessments generated prior to November 10, 2021.*

Report Area	Population Age 20+	Adults with BMI > 30.0 (Obese)	Adults with BMI > 30.0 (Obese), Percent
Caribou County, ID	4,909	1,512	30.8%

### Stroke, Prevalence Among Adults Age 18+ by ZCTA, CDC BRFS PLACES Project 2020

## Healthcare Workforce

A lack of access to care presents barriers to good health. The supply and accessibility of facilities and physicians, the rate of uninsurance, financial hardship, transportation barriers, cultural competency, and coverage limitations affect access.

Rates of morbidity, mortality, and emergency hospitalizations can be reduced if community residents access services such as health screenings, routine tests, and vaccinations. Prevention indicators can call attention to a lack of access or knowledge regarding one or more health issues and can inform program interventions.

### Access to Care - Addiction/Substance Abuse Providers

This indicator reports the number of providers who specialize in addiction or substance abuse treatment, rehabilitation, addiction medicine, or providing methadone. The providers include Doctors of Medicine (MDs), Doctor of Osteopathic Medicine (DOs), and other credentialed professionals with a Center for Medicare and Medicaid Services (CMS) and a valid National Provider Identifier (NPI). The number of facilities that specialize in addiction and substance abuse treatment are also listed (but are not included in the calculated rate). Data are from latest Centers for Medicare and Medicaid Services (CMS) National Plan and Provider Enumeration System (NPPES) Downloadable File.

Within the report area there is 0 provider who specialize in addiction or substance abuse. This represents 0.00 providers per 100,000 total population.

Report Area	Total Population (2020)	Number of Facilities	Number of Providers	Providers, Rate per 100,000 Population

## Access to Care - Mental Health

This indicator reports the number of mental health providers in the report area as a rate per 100,000 total area population. Mental health providers are defined as psychiatrists, psychologists, licensed clinical social workers, counselors, marriage and family therapists, and mental health providers that treat alcohol and other drug abuse, as well as advanced practice nurses specializing in mental health care. Data from the 2021 Centers for Medicare and Medicaid Services (CMS) National Provider Identifier (NPI) downloadable file are used in the 2022 County Health Rankings.

Within the report area there are 3 mental health providers with a CMS National Provider Identifier (NPI). This represents 42.1 providers per 100,000 total population.

Note: Data are suppressed for counties with population greater than 1,000 and 0 mental health providers.

Report Area	Estimated Population	Number of Mental Health Providers	Ratio of Mental Health Providers to Population (1 Provider per x Persons)	Mental Health Care Provider Rate (Per 100,000 Population)

## Access to Care - Primary Care

This indicator reports the number of primary care physicians per 100,000 population. Doctors classified as "primary care physicians" by the AMA include: General Family Medicine MDs and DOs, General Practice MDs and DOs, General Internal Medicine MDs and General Pediatrics MDs. Physicians age 75 and over and physicians practicing sub-specialties within the listed specialties are excluded. This indicator is relevant because a shortage of health professionals contributes to access and health status issues and is used in the 2022 County Health Rankings.

Within the report area there are 4 primary care physicians. This represents 55.90 providers per 100,000 total population.

*Note: Data are suppressed for counties with population greater than 2,000 and 0 primary care physicians.*

## Federally Qualified Health Centers

This indicator reports the number of Federally Qualified Health Centers (FQHCs) in the community. This indicator is relevant because FQHCs are community assets that provide health care to vulnerable populations; they receive extra funding from the federal government to promote access to ambulatory care in areas designated as medically underserved.

Within the report area, there is 0 Federally Qualified Health Center. This means there is a rate of 0.00 Federally Qualified Health Centers per 100,000 total population.

### COVID-19 Fully Vaccinated Adults

This indicator reports the percent of adults fully vaccinated for COVID-19. Data is updated daily from the CDC API. Vaccine hesitancy is the percent of the population estimated to be hesitant towards receiving a COVID-19 vaccine. The Vaccine Coverage Index is a score of how concerning vaccine rollout may be in some communities compared to others, with values ranging from 0 (least concerning) to 1 (most concerning).

Report Area	Percent of Adults Fully Vaccinated	Estimated Percent of Adults Hesitant About Receiving COVID-19 Vaccination	Vaccine Coverage Index	Last Update
